

U.S. History Hack — Tennessee Technology-in-the-Classroom Law Compliance Matrix

TroopToTeacher Technologies, LLC · app.ushistoryhack.com · Tennessee EOC U.S. History (grades 9-12)

Prepared July 2026 · Reflects Tennessee law through the 114th General Assembly (2025-2026)

How to read this document. This is a vendor self-assessment and compliance-mapping aid prepared by TroopToTeacher Technologies. It is NOT legal advice and NOT a third-party certification, audit, or accreditation. Entries marked "self-attested" are the vendor's own representations that a control is in place; they have not been verified by an outside agency. Where a control is forward-looking (e.g., independent penetration testing, external assistive-technology verification), it is labeled as committed or scheduled rather than completed; accessibility conformance is self-assessed via VPAT 2.5, not independently certified. Statutory citations reflect good-faith research as of July 2026 and should be confirmed with district counsel before reliance.

Scope. U.S. History Hack serves grades 9-12. Several 2026 Tennessee laws (e.g., the K-5 device restriction, Public Chapter 808) fall outside that grade band and are marked accordingly. A district's own Acceptable Use, AI, and technology policies may impose additional local requirements not captured here; those can be mapped in a second pass.

Status legend: **Meets (self-attested)** = vendor attests the control is in place. **Compatible / District-configured** = the legal duty is the district's; U.S. History Hack is built to fit it. **Supports** = U.S. History Hack assists a district obligation. **N/A — out of scope** = the law targets a grade band or actor outside U.S. History Hack's use.

A. Student Data Privacy & Security

Tenn. DATAA (§ 49-1-701 et seq.) · Tenn. SOPPA (§ 49-1-708) · FERPA · COPPA · CIPA · TN Breach Notification Act (§ 47-18-2107)

Requirement & Citation	How U.S. History Hack Meets It	Status	Evidence
No targeted advertising — Tenn. SOPPA, T.C.A. § 49-1-708. Operators may not use covered student information for targeted advertising.	U.S. History Hack contains no advertising of any kind — no behavioral ads, no interest profiles, no retargeting on other sites.	Meets (self-attested)	FERPA/TN Student Data Privacy Statement §5; Privacy Policy
No sale of student data — Tenn. SOPPA § 49-1-708.	The vendor does not and will not sell, rent, or trade student information — in identified, de-identified, or aggregated form.	Meets (self-attested)	TN Data Privacy Statement §6
No non-educational profiling — Tenn. SOPPA § 49-1-708.	Student data is used only to deliver U.S. History instruction; no profiling of interests/behaviors for any non-educational purpose.	Meets (self-attested)	TN Data Privacy Statement §7
Reasonable security — Tenn. SOPPA § 49-1-708(b)(4); Tenn. DATAA § 49-1-706.	TLS 1.2+ in transit; AES-256 transparent data encryption at rest (Azure SQL); Microsoft Entra ID Conditional Access + MFA for admin access; per-district row-level tenant isolation; Microsoft Defender for Cloud + GitHub Advanced Security (CodeQL, Dependabot, secret scanning). Independent third-party penetration testing is committed (not yet completed) per the Pentest Plan. The § 9 control set is stated as of the June 1, 2026 general-availability date.	Meets (self-attested)	TN Data Privacy Statement §9; Breach Response Plan; annual-pentest-plan.md
Data minimization — Tenn. DATAA § 49-1-703 (student data definitions).	Collects only roster identity (via district IdP) + learning records. No SSN, DOB, home address, biometrics, or precise geolocation. Demographics are not collected directly by the platform.	Meets (self-attested)	TN Data Privacy Statement §1
On-device (unauthenticated) data — Data-minimization best practice under DATAA/SOPPA.	For public/preview use, student progress is stored only in the browser's localStorage on the student's own device and is never transmitted to vendor servers.	Meets (self-attested)	TN Data Privacy Statement §1.5; lib/progress-store
Deletion on request — Tenn. SOPPA § 49-1-708.	Student information is deleted within 30 calendar days of a verified request from an authorized official, parent, or eligible student.	Meets (self-attested)	TN Data Privacy Statement §10; Data Disposal & Retention Policy
Breach notification — T.C.A. § 47-18-2107 (TN Breach Notification Act); SOPPA § 49-1-708.	Documented Security Incident & Breach Response Plan with a 72-hour district-notification commitment; cooperates with each district's FERPA	Meets (self-attested)	TN Data Privacy Statement §9(g) & Certification #9 (FERPA breach §4);

Requirement & Citation	How U.S. History Hack Meets It	Status	Evidence
	notification duties.		Breach Response Plan
FERPA "school official" / direct control — 20 U.S.C. § 1232g; 34 CFR § 99.31(a)(1)(i)(B).	Operates as a school official with legitimate educational interests, under district control; uses records only for the educational service; no redisclosure without district authorization.	Meets (self-attested)	TN Data Privacy Statement Part III
Data-sharing / processing agreement — Tenn. DATAA § 49-1-701 et seq.	Vendor executes a Data Processing / Data Sharing Agreement with the district; the controls are in place before the first student record is written, and the DPA incorporates the SOPPA/FERPA commitments.	Meets (self-attested)	TN Data Privacy Statement §2.2 & Certification #12; docs/data-processing-agreement.md
COPPA (under 13) — 15 U.S.C. §§ 6501-6506; 16 CFR Part 312.	Designed for grades 9-12 (ages 14-18); not directed to children under 13. Any under-13 access relies on the school-authorization doctrine, with the district as consent intermediary.	Meets / limited scope	TN Data Privacy Statement Part VI

B. Internet Safety, Acceptable Use & Content Filtering (2026 changes)

HB1886 (2026 AUP overhaul + annual audit) · Teen Social Media & Internet Safety Act, HB825/SB811 · T.C.A. § 49-1-221 · CIPA (47 U.S.C. § 254(h))

Requirement & Citation	How U.S. History Hack Meets It	Status	Evidence
Acceptable Use Policy — updated requirements + annual audit — HB1886 (2026, amends Title 49); T.C.A. § 49-1-221. LEAs must maintain an internet AUP, obtain an annual third-party audit and post it publicly, and notify parents when an under-18 student reaches a site that violates the policy.	This is a district obligation. U.S. History Hack is built to fit any district AUP: instructional-only content, no open-web browsing, no student-to-public posting, no advertising, and content governed by a documented content-governance policy.	District-configured (HH compatible)	docs/compliance/content-governance-policy.md
Block social-media access on school internet — "Teen Social Media and Internet Safety Act," HB825/SB811. From 2025-26, LEAs must prohibit student access to social-media platforms on LEA-provided internet except when a teacher authorizes it for educational purposes.	U.S. History Hack is not a social-media platform and embeds no social-media platforms (Facebook / X / Instagram / TikTok). Instructional video is limited to curated YouTube embeds surfaced as district curriculum content. The optional "Study Squads" peer feature is a closed, roster-scoped study group — not a public social network — and ships default-OFF behind a feature flag.	Meets (does not route students to social media)	lib/feature-flags/optional-features.ts (study-groups default off); Curriculum Hub uses curated YouTube embeds only
Internet Safety Curriculum, K-12 — T.C.A. § 49-1-221; DOE 6-12 safety guidance (HB825/SB811, due Jan 1, 2026).	District curriculum obligation. U.S. History Hack content is curated, standards-aligned, and free of external unsafe links; it supports safe, supervised use but does not deliver the required safety curriculum itself.	Supports district obligation	docs/compliance/content-governance-policy.md
Content filtering — CIPA, 47 U.S.C. § 254(h).	All content is pre-authored, curated U.S. History with cited public-domain media; no open search, no third-party ad/analytics networks. Fully compatible with district CIPA content filters.	Meets / compatible	TN Data Privacy Statement §12; content-governance-policy.md

C. Digital Devices & Screen Time (2026 change)

HB2393/SB2310, Public Chapter 808 — K-5 digital-device and electronic-testing restriction (effective July 1, 2026)

Requirement & Citation	How U.S. History Hack Meets It	Status	Evidence
K-5 digital-device restriction + electronic-testing ban + device-use policy — HB2393/SB2310, Public Chapter 808 (eff. July 1, 2026). Restricts digital-device access, digital instruction, and electronic testing for grades K-5, and requires an age-appropriate device-use policy. Exempts virtual schools and students with disabilities (IEP/504).	U.S. History Hack serves grades 9-12 (Tennessee EOC U.S. History, US.01-US.95). The K-5 device-access and electronic-testing restrictions do not reach grades 9-12. If a district were to use U.S. History Hack in an elementary setting, the district's device-use policy and the statute's exceptions would govern.	N/A — out of grade scope (9-12)	Product scope: grades 9-12; TN Data Privacy Statement Part I

D. Artificial Intelligence

2024 LEA/charter AI-use-policy requirement · SB0514/HB0531 (2025) — student AI instruction (2026-27), DOE guidance, teacher PD

Requirement & Citation	How U.S. History Hack Meets It	Status	Evidence
LEA/charter AI-use policy governs student- and staff-facing AI — 2024 TN AI-policy requirement (Title 49; cf. § 49-7-185 higher-ed analog).	U.S. History Hack uses NO runtime or generative AI in the student experience. Students never interact with a language model; all questions, feedback, definitions, and content are static, pre-authored, and human-reviewed. No student data is sent to any AI system — so there is no student-facing AI for a district AI-use policy to restrict.	Meets / compatible	docs/ai-disclosure.md; TN Data Privacy Statement Part V
Age-appropriate student AI instruction — SB0514/HB0531 (2025); AI instruction beginning 2026-27, with DOE guidance + teacher PD.	A district curriculum obligation, not a vendor requirement. U.S. History Hack's clear labeling (human-authored content, no AI generation) gives teachers an honest, transparent example to support AI-literacy instruction.	Supports district obligation	docs/ai-disclosure.md
AI transparency / disclosure — TN responsible-AI expectations.	Publicly discloses the authoring-time AI tools used during content development: a large language model (Anthropic Claude) drafted text content and quiz questions, and an OpenAI image-generation model produced illustrations only (workbook covers, the "C-Q130"/"CORE" narrative characters, avatar-store images, and icons). Every AI-assisted item was reviewed and approved by a qualified educator. No student-AI interaction at runtime; the AI-generated avatar images are currently paused pending a provenance and copyright review.	Meets (self-attested)	docs/ai-disclosure.md

E. Accessibility

ADA Title II (DOJ 2024 rule, WCAG 2.1 AA) · Section 504 (29 U.S.C. § 794) · Section 508 (29 U.S.C. § 794d)

Requirement & Citation	How U.S. History Hack Meets It	Status	Evidence
WCAG 2.1 AA conformance — ADA Title II (DOJ 2024 rule; compliance dates Apr 2026 / Apr 2027); applies to public-school digital content.	Self-assessed VPAT 2.5 / Accessibility Conformance Report targeting WCAG 2.2 AA (meets or exceeds the ADA Title II WCAG 2.1 AA baseline); automated axe-core checks run in CI on every pull request to main; assistive-technology testing report (external verification scheduled).	Self-assessed + continuous axe-core CI	docs/compliance/VPAT-2.5-ACR.md; a11y-evidence workflow; axe-core CI
Equal access / UDL / accommodations — Section 504, 29 U.S.C. § 794.	Bilingual English/Spanish throughout; read-aloud (text-to-speech); UDL supports; print alternatives for on-screen activities; keyboard-accessible interactive elements.	Meets (self-attested)	docs/accessibility-statement.md; assistive-technology-testing-report.md
Section 508 — 29 U.S.C. § 794d (federally funded programs).	VPAT 2.5 self-assessment documents conformance against the Section 508 / WCAG 2.x AA criteria; remediation tracked in a district-facing remediation log.	Self-assessed (VPAT 2.5)	docs/compliance/VPAT-2.5-ACR.md; docs/a11y/district-remediation-2026-07.md
