TENNESSEE CONNECTION • WILLIAMSON COUNTY & GEORGE JORDAN

A hometown hero connects our county to the westward expansion of this unit (US.01–US.02). George Jordan of Triune in Williamson County served with the 9th U.S. Cavalry — the “Buffalo Soldiers” — on the western frontier, and earned the Medal of Honor for his defense of Fort Tularosa (1880) and Carrizo Canyon (1881). His story ties the settlement of the West, the railroads, and the federal government’s campaigns against Native nations to the people of our own community.

One common workbook designed for learner variability. Every student works toward the same Tennessee standards; supports vary the means, not the goal or the ceiling.

PROGRESS CHECK • one question

Analyze the relationship between the Homestead Act and the decline of American Indian territories. What was the primary cause-and-effect relationship?

- A. Free land incentivized settlers to claim territory that had been promised to American Indians
- B. The Act directly funded military campaigns against tribes, but the historical record tells a more complex story
- C. American Indians voluntarily sold their land to homesteaders
- D. The Act only affected lands that had never been occupied, but this oversimplifies the complex factors at work

Reading type: History Hack-authored instructional synthesis. This is not a primary source. Builds SSP.03 (synthesize) and SSP.05 (historical awareness).

CORE PATH — read one chunk at a time

Sequence the expansion of the United States

The Homestead Act of 1862 offered 160 acres of free land to settlers who would farm it for five years. Combined with the completion of the Transcontinental Railroad in 1869, these policies accelerated westward expansion as part of Manifest Destiny—the belief that Americans were destined to spread across the continent. The Union Pacific built westward from Omaha while the Central Pacific built eastward from Sacramento, meeting at Promontory Summit, Utah.

Impact on Western Settlement

The Transcontinental Railroad dramatically reduced travel time from months to days, opening the West to settlement, commerce, and resource extraction. Towns sprang up along rail lines, and agricultural products could now reach eastern markets efficiently. However, this expansion came at tremendous cost to American Indian nations whose lands were taken and whose way of life was destroyed.

Impact on American Indians, Immigrants, and Settlers

Western expansion devastated American Indian communities through forced relocations, broken treaties, and the near-extinction of buffalo herds they depended upon. Immigrants, particularly Chinese workers who built much of the Central Pacific, faced discrimination despite their crucial contributions. The "Buffalo Soldiers"—African American cavalry regiments—served on the frontier, including George Jordan of Williamson County, Tennessee, who received the Medal of Honor for his service.

Geographer's Lens — US.01 ~12 min

Geographers don't just find places — they explain how WHERE shapes WHAT happens. Work these like a geographer. Built on the Five Themes of Geography • C3 Dimension 2 • SSP.06 (spatial reasoning).

THE PLACES — then explain why geography put them there

The transcontinental railroad and the Homestead Act reshaped the American West. Locate the railroad route and the lands opened to settlement, then explain how geography drove westward expansion — and what it cost the Native nations already living there.

Place	Where	What happened (given)	Why HERE? (your analysis)
Omaha, Nebraska	Great Plains	eastern terminus — the Union Pacific built west from here	
Promontory Summit, Utah	Great Basin	1869 — the golden spike joined the Union Pacific and Central Pacific	
Sacramento, California	West Coast	western terminus — the Central Pacific built east from here	
The Great Plains	Interior West	Homestead Act opened 160-acre plots to settlers; the buffalo and Native nations were pushed out	
Indian Territory (Oklahoma)	Southern Plains	where the federal government forced many displaced Native nations	

MOVEMENT & REGION — what's the spatial pattern?

In 1–2 sentences: is this a movement, a cluster, or a whole region? Name the direction or shape it takes on a map.

GEOGRAPHY AS A FORCE — how did location shape the outcome?

How did geography change WHAT happened — who was affected, how far or fast it spread, or who was left out? Use one place above as your evidence.

[DOK 2 • item US.01-Q02 • pre-field-test]

Which statement best explains how the Transcontinental Railroad facilitated western expansion?

- A. It reduced travel time from months to days and enabled efficient movement of settlers, goods, and resources across the continent
- B. It was built exclusively by American workers, providing jobs for tens of thousands of unemployed citizens
- C. It eliminated the need for wagon trains and stagecoaches almost overnight, ending earlier overland travel
- D. It provided direct access to gold mines in California

[DOK 2 • item US.01-Q04 • pre-field-test]

Which of the following best describes a direct impact of the Homestead Act of 1862 on settlement patterns in the American West?

- A. It restricted western migration by requiring settlers to purchase land at market prices from the federal government
- B. It encouraged settlement by offering 160 acres of public land to citizens who agreed to farm it for five years
- C. It redirected migration to the Pacific Coast by offering free land only in Oregon and Washington territories
- D. It promoted settlement exclusively among formerly enslaved people as part of Reconstruction land redistribution

The Cherokee, Chickasaw, and other tribes had deep historical roots in Tennessee before the Indian Removal Act of 1830 forced their relocation along the Trail of Tears, which began at Ross's Landing (now Chattanooga). Activity 4 — Close Read — US.02 ~15 min

CORE PATH — read one chunk at a time

Movement to Reservations

Following the Civil War, the federal government intensified efforts to confine American Indian nations to reservations—designated territories far smaller than their traditional homelands. This policy aimed to open land for white settlement and eliminate perceived obstacles to westward expansion. Tribes were forced to sign treaties under duress, often surrendering millions of acres.

Assimilation and Boarding Schools

The government pursued forced assimilation, attempting to destroy American Indian cultures and replace them with Euro-American ways. Boarding schools like Carlisle Indian Industrial School operated under the motto "Kill the Indian, save the man." Children were taken from families, forbidden to speak their languages or practice traditions, and subjected to harsh discipline. This cultural genocide had devastating, generational impacts.

The Dawes Act and Its Impact

The Dawes Act of 1887 divided tribal lands into individual allotments, supposedly to encourage farming and "civilize" American Indians. However, the true effect was catastrophic: tribal landholdings shrank from 138 million acres in 1887 to 48 million by 1934. "Surplus" lands were sold to white settlers, and many allotted lands were lost through taxation, fraud, or forced sales. The Act destroyed communal land ownership central to many tribal cultures.

Reading type: History Hack-authored instructional synthesis. This is not a primary source. Builds SSP.03 (synthesize) and SSP.05 (historical awareness).

CORE PATH — read one chunk at a time

The Election of 1876 and End of Reconstruction

The disputed 1876 presidential election between Republican Rutherford B. Hayes and Democrat Samuel Tilden led to the Compromise of 1877. In exchange for the presidency, Hayes agreed to withdraw federal troops from the South, effectively ending Reconstruction. This abandonment left African Americans without federal protection against increasingly hostile state governments.

Jim Crow Laws, Lynching, and Disenfranchisement

With federal protection gone, Southern states implemented Jim Crow laws enforcing racial segregation in all aspects of life. African Americans faced systematic disenfranchisement through poll taxes, literacy tests, grandfather clauses, and white primaries. Those who resisted faced terrorism, including lynching—public murders that went unpunished and were often celebrated by white communities.

Pap Singleton and the Exodusters

Benjamin "Pap" Singleton, a formerly enslaved man, organized the migration of thousands of African Americans from the South to Kansas in 1879. These "Exodusters" sought to escape violence and oppression, establishing communities like Nicodemus, Kansas. While conditions in Kansas were often harsh, the Exoduster movement represented African American agency and resistance to Jim Crow terror.

Plessy v. Ferguson and "Separate But Equal"

The 1896 Supreme Court decision in Plessy v. Ferguson established the "separate but equal" doctrine, ruling that racial segregation was constitutional as long as facilities were supposedly equal. In practice, facilities for African Americans were grossly inferior. This decision legitimized Jim Crow segregation for nearly sixty years until Brown v. Board of Education (1954).

Political Machines and Boss Tweed

The Gilded Age (1870s-1900) saw the rise of powerful political machines that controlled city governments through patronage and corruption. Boss Tweed's Tammany Hall in New York City epitomized this system, funneling millions in public funds to Tweed and his associates. Political cartoonist Thomas Nast exposed Tweed's corruption through devastating illustrations in Harper's Weekly.

Major Scandals and the Spoils System

The era was marked by corruption at all levels. The Crédit Mobilier scandal revealed that railroad executives and congressmen had profited enormously from fraudulent construction contracts. The spoils system—giving government jobs to political supporters regardless of qualification—reached its peak. President James Garfield's assassination by a disappointed office-seeker in 1881 finally prompted reform.

Civil Service Reform

Garfield's assassination led to the Pendleton Civil Service Act of 1883, which established merit-based hiring for federal positions through competitive examinations. This began the long process of professionalizing government service, though political influence remained significant in many positions.

Economic Disparity

The Gilded Age saw extreme wealth concentration among industrial capitalists while farmers struggled with falling crop prices, high railroad shipping rates, and debt. Wage earners faced dangerous working conditions, long hours, and low pay. The Interstate Commerce Act of 1887 attempted to regulate railroad rates, representing early federal intervention in the economy.

Reading type: History Hack-authored instructional synthesis. This is not a primary source. Builds SSP.03 (synthesize) and SSP.05 (historical awareness).

CORE PATH — read one chunk at a time

Technological Innovations

The late 19th century saw transformative inventions that reshaped American life. Alexander Graham Bell's telephone (1876) revolutionized communication. Thomas Edison's electrical systems and light bulb brought power to homes and factories. Nikola Tesla's alternating current system enabled long-distance electrical transmission. Henry Bessemer's steel process made skyscrapers and modern infrastructure possible.

Industrial Titans

Andrew Carnegie built a steel empire through vertical integration, controlling every step from iron mines to finished products. John D. Rockefeller's Standard Oil pioneered horizontal integration, buying out competitors to dominate the oil industry. J.P. Morgan wielded enormous financial power, reorganizing railroads and creating U.S. Steel. Cornelius Vanderbilt consolidated railroad networks, enabling national commerce.

African American Entrepreneurs

Despite facing discrimination, African American entrepreneurs made significant contributions. Madam C.J. Walker became America's first female self-made millionaire through her hair care products, employing thousands of Black women. George Washington Carver's agricultural research at Tuskegee Institute developed hundreds of products from peanuts and sweet potatoes, helping diversify Southern agriculture.

CORE PATH — read one chunk at a time

Major Industrial Centers

Industrialization concentrated in cities with geographic advantages. Pittsburgh became the steel capital due to access to coal, iron ore, and rivers. Chicago emerged as a railroad hub and meatpacking center. New York City dominated finance and trade through its port. Boston led in textiles and manufacturing. San Francisco served as the gateway to Pacific trade and western resources.

Rural-to-Urban Migration

Industrialization drew millions from farms to cities seeking factory jobs. The promise of wages attracted both native-born Americans and immigrants. Cities grew explosively—Chicago's population increased from 30,000 in 1850 to over 1 million by 1890. This rapid growth created overcrowded tenements, inadequate sanitation, and new social challenges.

Geographic Factors in Industrial Location

Industries located based on access to raw materials, transportation, markets, and labor. Steel mills clustered near coal and iron deposits. Textile mills used water power and later concentrated near ports for cotton imports. Meatpacking centered in Chicago due to railroad connections to cattle ranges and eastern markets. These patterns shaped regional development for generations.

Old and New Immigrants

"Old" immigrants (pre-1880) came primarily from Northern and Western Europe—Britain, Ireland, Germany, Scandinavia. They often spoke English or related languages and were predominantly Protestant. "New" immigrants (1880-1920) came from Southern and Eastern Europe—Italy, Poland, Russia, Greece—as well as Asia. They brought different languages, religions (Catholic, Orthodox, Jewish), and customs that many Americans viewed with suspicion.

Entry Points and the Assimilation Process

Ellis Island in New York Harbor processed millions of European immigrants, while Angel Island in San Francisco served Asian immigrants with far more restrictive procedures. New immigrants faced difficult assimilation: language barriers, discrimination, and unfamiliar customs. Jane Addams's Hull House in Chicago pioneered settlement houses that helped immigrants learn English, navigate American systems, and maintain cultural connections.

Push and Pull Factors

Push factors drove people from their homelands: religious persecution (especially of Jews in Russia), poverty, political upheaval, and lack of opportunity. Pull factors attracted them to America: economic opportunity, religious freedom, land availability, and established immigrant communities. Letters from successful immigrants encouraged others to follow.

Nativism and Restriction

The rise of nativism—hostility toward immigrants—led to restrictive legislation. The Chinese Exclusion Act of 1882 banned Chinese immigration for ten years (repeatedly renewed until 1943). The Gentleman's Agreement of 1907 limited Japanese immigration. Jacob Riis's photographs and writings, including "How the Other Half Lives," exposed immigrant living conditions, prompting both sympathy and nativist fears.

How did western expansion in the 1860s–1880s affect American Indians and European immigrants differently?

- A. American Indians lost land and sovereignty through forced removal and treaty violations, while European immigrants gained economic opportunities and land ownership
- B. Both groups benefited equally from new economic opportunities created by railroad expansion and land grants
- C. European immigrants were confined to reservations while American Indians moved freely onto former frontier lands
- D. Both groups experienced forced relocation, but American Indians eventually received citizenship rights earlier than European immigrants

Analyze the role of Jane Addams and settlement houses in the immigrant experience.

- A. Settlement houses forced immigrants to abandon their cultures, although this view has been largely discredited by scholars
- B. Settlement houses were primarily religious conversion centers, which ignores key developments that shaped the outcome
- C. They provided services and community while helping immigrants navigate American society without erasing cultural identity
- D. They had minimal impact on immigrant communities, which represents a common misconception about the period

Activity 7 — Constructed Response (CER) — US.07 ~15 min

BIG-QUESTION ORGANIZER — as America industrialized, who built the new economy, who profited, and who paid the price?

Jot quick notes from THIS standard: Who benefited? • Who bore the costs? • Who decided?

CONSTRUCTED RESPONSE (CER) — builds SSP.04 Argumentation

Claim + Evidence + Reasoning: Using this standard, take a position on the central question — describe the differences between "old" and "new" immigrants, analyze the assimilation process for "new" immigrants, and determine the impacts of increased migration on American society? Support your claim with two pieces of evidence from the passage and explain your reasoning.

How did the experience at Angel Island differ from Ellis Island?

- A. Angel Island had far more restrictive procedures, particularly targeting Asian immigrants
- B. Angel Island processed immigrants more quickly, which does not reflect the consensus among historians
- C. Ellis Island was only for wealthy immigrants, but the historical record tells a more complex story
- D. There was no significant difference between the two, which does not reflect the consensus among historians

Your Tennessee Connection

TENNESSEE CONNECTION • WILLIAMSON COUNTY & THE BUFFALO SOLDIERS

Our own county is woven into the story of the industrializing nation. George Jordan of Triune, in Williamson County, is the only Medal of Honor recipient from the county. He served with the 9th U.S. Cavalry — the “Buffalo Soldiers,” regiments of Black soldiers who patrolled the western frontier — and

was honored for his defense of Fort Tularosa, New Mexico (1880) and Carrizo Canyon (1881) (US.01–US.02). Tennessee itself industrialized fast in these decades: railroads, coal mining on the Cumberland Plateau, and iron and textile mills reshaped the state’s economy — even as the convict-lease system and Jim Crow (US.03) shaped who benefited and who bore the costs.

Reflect (RESPONSE CHOICE): How does a local story change the way you understand a national event? Answer by writing, recording, or diagramming.

Local History Investigation

Industrialization touched Tennessee directly — railroads, coal mines, iron works, and textile mills, and the people who worked them. Investigate one local connection and record what you find.

US.01: Using this standard, take a position on the central question — explain how the Homestead Act and the Transcontinental Railroad impacted the settlement of the West, including their effects on American Indians, immigrants, and settlers? Support your claim with two pieces of evidence from the passage and explain your reasoning.

US.02: Using this standard, take a position on the central question — examine federal policies toward American Indians, including the movement to reservations, assimilation, boarding schools, and the Dawes Act? Support your claim with two pieces of evidence from the passage and explain your reasoning.

US.03: Using this standard, take a position on the central question — explain the impact of the Compromise of 1877, including Jim Crow laws, lynching, disenfranchisement methods, the efforts of Pap Singleton and the Exodusters, and the Plessy v. Ferguson decision? Support your claim with two pieces of evidence from the passage and explain your reasoning.

US.04: Using this standard, take a position on the central question — analyze the causes and consequences of Gilded Age politics and economics, including political machines, major scandals, civil service reform, and economic differences between farmers, wage earners, and industrial capitalists? Support your claim with two pieces of evidence from the passage and explain your reasoning.

US.05: Using this standard, take a position on the central question — describe the changes in American life that resulted from the inventions and innovations of business leaders and entrepreneurs of the period, including Alexander Graham Bell, Andrew Carnegie, Thomas Edison, John D. Rockefeller, Madam C.J. Walker, and George Washington Carver? Support your claim with two pieces of evidence from the passage and explain your reasoning.

US.06: Using this standard, take a position on the central question — locate major industrial centers and describe how industrialization influenced the movement of people from rural to urban areas? Support your claim with two pieces of evidence from the passage and explain your reasoning.

US.07: Using this standard, take a position on the central question — describe the differences between "old" and "new" immigrants, analyze the assimilation process for "new" immigrants, and determine the impacts of increased migration on American society? Support your claim with two pieces of evidence from the passage and explain your reasoning.

Think Like a Test-Writer (unit review — open to all)

You met a quick "think like a test-writer" prompt in every standard. Here is the full how-to, once, plus room to write your best questions for the whole unit.

HOW TO WRITE A DOK-3 QUESTION

DOK-3 = strategic thinking: the reader must analyze, compare, evaluate, or justify using evidence — and there should be more than one defensible answer (not a fact you can just look up).

Sentence starters: "Why did _____ lead to _____?" • "Which mattered more — _____ or _____ — and why?" • "What is the BEST evidence that _____?" • "Evaluate whether _____." • "Defend or challenge: _____."

Frame: [Analyze / Evaluate / Justify] + [something from this unit] + "using evidence."

Quick check: does my question make the reader THINK and use evidence? If yes, it's DOK-3.

Standard	Your DOK-3 question	Your answer key (one sentence)

The Rise of Industrialization — Four Threads

This section connects the threads of the era: how the nation settled a continent, abandoned Reconstruction, built an industrial economy, and became a land of cities and immigrants — and who benefited and who bore the costs. It is History Hack-authored instructional synthesis grounded in this unit's sourced record — not a primary source.

Taming a Continent

The transcontinental railroad, the Homestead Act, and a flood of settlers transformed the West into farms, ranches, and mining towns (US.01) — a conquest that came at devastating cost to the Native nations who were forced onto reservations by federal policy (US.02).

A Promise Abandoned

Reconstruction ended with the Compromise of 1877, and Southern states built the Jim Crow system — segregation, disenfranchisement, and the "separate but equal" doctrine upheld in Plessy v. Ferguson — that would stand for generations (US.03).

An Industrial Colossus

New inventions, cheap steel, oil, and new ways of organizing business (trusts and vertical integration) built an industrial economy of staggering scale and immense private fortunes — the Gilded Age, its wealth shadowed by corruption and inequality (US.04, US.05).

A Nation of Cities and Newcomers

Industry pulled millions into booming, crowded cities and drew a new wave of immigrants from southern and eastern Europe and Asia, remaking American society (US.06, US.07) — even as tenement poverty and nativist backlash revealed the era’s costs.

Unit Reflection

Return to the unit’s big question: as America industrialized, who built the new economy, who profited, and who paid the price? Write a final claim with two pieces of evidence from different standards.
