

# TEAM-Aligned Lesson Plan

U.S. History (Grades 9–12) · Franklin High School · Williamson County Schools

**Standard:** US.05 — Inventions & Innovations of Business Leaders & Entrepreneurs

**Schedule:** Regular block — 47 minutes · Date: \_\_\_\_\_ · Teacher: \_\_\_\_\_

**TN Standard (full text):** *Describe the changes in American life that resulted from the inventions and innovations of business leaders and entrepreneurs of the period, including: Alexander Graham Bell, Henry Bessemer, Andrew Carnegie, Thomas Edison, J.P. Morgan, John D. Rockefeller, Nikola Tesla, Cornelius Vanderbilt, Madam C.J. Walker, George Washington Carver.*

## 1 · Standards & Objectives

**Learning objective (I-CAN):** “I can describe the changes in American life that resulted from the inventions and innovations of business leaders and entrepreneurs of the period, including Alexander Graham Bell, Andrew Carnegie, Thomas Edison, John D. Rockefeller, Madam C.J. Walker, and George Washington Carver.”

**Sub-objectives (sequenced from the standard's criteria):**

- Technological Innovations.
- Industrial Titans.
- African American Entrepreneurs.

**Connection to prior learning:** Builds on US.04 (Gilded Age Politics and Economics) — students carry yesterday's understanding into today's standard.

**Tennessee connection:** Tennessee played a role in the era's innovation boom. The L&N Railroad connected Nashville and Chattanooga to national markets, and Chattanooga became an iron and steel center nicknamed the 'Dynamo of Dixie.' Jack Daniel's distillery in Lynchburg (est. 1866) became one of Tennessee's most recognizable brands.

## 2 · Assessment & Evidence of Mastery

**Measured in multiple ways (TEAM: 3+ measures with clear criteria):**

- **Selected-response + short constructed:** US.05 Formative Assessment (with teacher answer key).
- **Extended writing:** CER organizer — claim, evidence, reasoning on the Inventions & Innovations of Business Leaders & Entrepreneurs.
- **Primary-source analysis:** HIPPO organizer on “The Gospel of Wealth” (Andrew Carnegie, 1889).
- **Exit ticket (EN + ES):** 2-question check for understanding, bilingual.

**Success criteria:** Student cites at least two specific pieces of evidence and can describe the changes in American life that resulted from the inventions and innovations of business leaders and entrepreneurs of the period, including Alexander Graham Bell, Andrew Carnegie, Thomas Edison, John D. Rockefeller, Madam C.J. Walker, and George Washington Carver.

## 3 · Lesson Structure & Pacing (47-minute Regular block)

| Min | Segment & what happens                                                                                                    | Material                                      |
|-----|---------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| 5   | Warm-Up / Bell-Ringer — recall Gilded Age Politics and Economics (US.04); frame today's question                          | Word Bank / Do-Now                            |
| 4   | Hook — Tennessee played a role in the era's innovation boom: Who gained, who was left out — and why does it still matter? | Teacher Deck                                  |
| 12  | Direct Instruction — teacher models close reading of the core content; students capture Cornell Notes                     | Teacher Deck + Cornell Notes                  |
| 10  | Guided Practice — Cornell Notes + a comparison/analysis organizer                                                         | Cornell Notes · organizer                     |
| 11  | Primary Source / HIPPO — analyze the source; begin CER                                                                    | Primary-Source Packet · HIPPO · CER organizer |
| 5   | Exit Ticket & Closure — 2-question check; preview US.06                                                                   | Exit Ticket (EN/ES)                           |

Total: 47 minutes (segments sum-verified to the block length; auto-adjusts to 43-min Activities or 41-min Late-Start).

## 4 · Activities & Materials (teacher-selected)

- Cornell Notes (Universal Front) — direct-teaching capture (cue / notes / summary)
- Cornell Support Backs — optional MTSS scaffold; lives in the Teacher Organizer Toolkit, prints duplex behind the Cornell front, copy only as needed
- Comparison / analysis organizer — structure student thinking on the core content
- Primary-Source Packet + HIPPO organizer — sourcing & analysis of “The Gospel of Wealth”
- CER organizer — evidence-based extended writing
- Formative Assessment + Exit Ticket (EN/ES) — checks for understanding

**Word Bank (key vocabulary):** Robber Barons/Captains of Industry · Vertical Integration · Horizontal Integration · Monopoly · Trust · Bessemer Process

*Complex text, student choice (organizer format), primary sources, and student-to-student discussion are built in — satisfying the TEAM Activities & Materials indicators.*

## 5 · Questioning Plan (DOK ladder, text-based, cite evidence)

| Level | Example question (US.05)                                                                                                                                 |
|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| DOK 1 | Define the key term “Robber Barons/Captains of Industry” and identify when it occurred.                                                                  |
| DOK 2 | In your own words, summarize the Inventions & Innovations of Business Leaders & Entrepreneurs and explain why it mattered.                               |
| DOK 3 | Analyze the significance of Madam C.J. Walker’s success in the context of her era.                                                                       |
| DOK 4 | Evaluate the long-term impact of the Inventions & Innovations of Business Leaders & Entrepreneurs — support your claim with evidence from the source(s). |

*Anchored to the US.05 content and item bank (DOK 1–4). Majority of questions are text-based; students cite evidence. Teacher may swap in additional bank items.*

## 6 · Thinking & Problem-Solving

- **Analytical thinking:** compare and contrast perspectives within the Inventions & Innovations of Business Leaders & Entrepreneurs.
- **Research-based thinking:** evaluate “The Gospel of Wealth” and related sources.
- **Problem-solving (drawing conclusions / justifying):** students build and defend a claim in the CER.

## 7 · Grouping & Feedback [teacher selects]

- **Grouping:** pairs for the CER organizer; whole-class for the primary-source model; individual exit ticket.
- **Feedback checkpoints:** circulate during Guided Practice and Primary-Source segments; use exit-ticket results to adjust tomorrow’s opening.

## 8 · Differentiation (Knowledge of Students)

- **ELL / WIDA:** UDL/WIDA overlay + sentence frames; Spanish exit ticket for entering/emerging levels.
- **IEP / 504:** chunked Cornell Notes (with the support back), extended time, read-aloud (browser TTS), reduced-item formative option.

## 9 · Environment Reminders (teacher-implemented)

*A lesson plan supports — but cannot manufacture — the TEAM Environment domain. Reminders:*

- Set high expectations; frame content with dignity and historical accuracy.
- Establish discussion norms before the primary-source analysis.
- Display current student work; keep materials accessible for the pair activity.

## 10 · Materials & Where to Print

**Included in today’s print ZIP** (US.05 — print-ready PDF + editable DOCX):

| Student (print & copy) | Teacher (your copy)                                    |
|------------------------|--------------------------------------------------------|
| Vocabulary — Word Bank | Teacher Lesson Plan (this doc)                         |
| Vocabulary Studio      | Cornell Support Backs — toolkit (copy as needed, MTSS) |

| Student (print & copy)                 | Teacher (your copy)               |
|----------------------------------------|-----------------------------------|
| Cornell Notes (Universal Front)        | Formative Assessment — Answer Key |
| Close Read                             | Primary-Source Teacher Guide      |
| Primary Source / Data Analysis + HIPPO | UDL / WIDA overlay                |
| Core Application — Practice Quiz       | File Map & Print Guide            |
| Constructed Response (CER)             |                                   |
| Exit Ticket — English & Spanish        |                                   |

*Note: students print the Cornell Notes Universal Front. The Cornell Support Backs (Guided/Light scaffolds) live in the Teacher Organizer Toolkit and print duplex on the reverse — copy them only for students who need them (MTSS), and fade as evidence grows.*

### Slides (download once for the unit):

Unit 1 Teacher Deck — US.05 slides. Download from Teacher Tools → Lecture Decks → Unit 1. (Decks are reused all unit, so they are not bundled in the daily ZIP.)

## 11 · Reflection & Next Steps

### Teacher reflection (complete after teaching):

- Did students meet the I-CAN? Cite the evidence — exit-ticket % correct, CER quality.
- What worked, and what would I change next time?
- Which sub-objective still needs another touch tomorrow?

### Extension / enrichment (for students who mastered it):

- Deeper source work: analyze a second primary source with the HIPPO organizer.
- Connect forward: how does the Inventions & Innovations of Business Leaders & Entrepreneurs set up US.06 (Industrial Centers and Urbanization)?

### If it's not working (reteach / intervention path):

- Below ~70% mastery on the exit ticket / formative → reteach with entry-tier materials (Cornell Notes + the Cornell Support Back + a shorter source) in a small group — MTSS Tier 2.
- **One click — “Remediate US.05”:** assembles a reteach pack (entry-tier worksheet, targeted DOK 1–2 questions, ELL/IEP supports) as a fresh print ZIP.
- **Mid-lesson trouble:** if pacing slips, protect the 5-min Exit Ticket — it's tomorrow's data — and move the CER to homework or the next day.

## Appendix · How this plan maps to the TEAM rubric

| TEAM indicator                       | Where addressed                                        |
|--------------------------------------|--------------------------------------------------------|
| Standards & Objectives               | §1 — I-CAN + sequenced sub-objectives + prior learning |
| Motivating Students                  | §3 Hook — Tennessee relevance                          |
| Presenting Content                   | §3 DI — deck visuals + Cornell Notes + modeling        |
| Lesson Structure & Pacing            | §3 — 47-min segmented, warm-up → closure               |
| Activities & Materials               | §4 — varied, choice, primary sources, complex text     |
| Questioning                          | §5 — DOK 1–4 ladder, text-based, cite evidence         |
| Feedback                             | §7 — checkpoints during guided practice                |
| Grouping                             | §7 — pairs + whole-class + individual                  |
| Teacher Content Knowledge            | §1/§4 — accurate, standards-aligned content            |
| Knowledge of Students                | §8 — UDL/WIDA + IEP/504                                |
| Thinking / Problem-Solving           | §6 — analytical, research-based, justify a claim       |
| <b>PLANNING: Instructional Plans</b> | Whole plan — sequenced, accommodations, closure        |
| <b>PLANNING: Student Work</b>        | §2 — CER + HIPPO extended writing                      |
| <b>PLANNING: Assessment</b>          | §2 — multiple measures + clear criteria                |

| TEAM indicator             | Where addressed                                          |
|----------------------------|----------------------------------------------------------|
| Environment (3 indicators) | §9 — reminders (teacher-implemented; not auto-generated) |

*The three PLANNING indicators (highlighted) are what a written plan is directly scored on — this template earns them structurally. The Instruction indicators are documented so the teacher walks in ready; the Environment domain is prompted, not generated.*
