Unit 2 • The Progressive Era (1877–1920) — Reform, Labor, Trusts & Women’s Suffrage

**In 1865, most Americans lived on farms.  
By 1920, most lived in cities.**

*What forces could move an entire nation off the land and into the factory in just 55 years?*

**TURN & TALK**

With a partner, list **three things** that might pull people toward cities — and **three things** that might push them off the farm. Keep your list; we will return to it at the end of the unit.

DOK 1

LOW STAKES

Everyone can answer this. Thumbs / whiteboards — no notes.

**Name the belief that poverty is 'natural' because only the strongest survive in society.**

✓ **ANSWER**

Social Darwinism — the application of Darwin's 'survival of the fittest' idea to human society, used to justify inequality and oppose government help for the poor.

**COMMIT FIRST:** have everyone answer before the reveal — this is the DOK 1 floor; the graded check later in this lesson moves up to DOK 2–3.

## Think About It

*In 1889, Jane Addams opened Hull House in Chicago to serve 50,000 neighborhood immigrants per week — all while being told by Social Darwinists that poverty was simply 'nature's way.'*

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

If survival of the fittest justified letting the poor struggle alone, why did thousands of volunteers rush to settlement houses to help them? What does that tension tell us about what Americans actually believed?

# Social Darwinism Explained

- Social Darwinism applied Charles Darwin's theory of 'survival of the fittest' to human society and economics.
- Proponents like Herbert Spencer and William Graham Sumner argued that wealth and success indicated natural superiority, while poverty indicated weakness.
- Business leaders used these ideas to defend monopolies, low wages, and opposition to labor reform, arguing that government intervention would interfere with natural economic selection.

**SENTENCE FRAME** (EL & writing support)

Social Darwinism argued that \_\_\_\_\_ was natural, while the Social Gospel argued that \_\_\_\_\_ had a duty to address poverty through \_\_\_\_\_.

# The Social Gospel Movement

- The Social Gospel was a Protestant reform movement that applied Christian ethics to social problems.
- Leaders like Walter Rauschenbusch argued that Christians had a duty to address poverty, unsafe working conditions, and urban inequality.
- Advocates supported settlement houses like Jane Addams' Hull House, labor reforms, and government intervention.
- Tennessee roots: Nashville's Fisk University and Vanderbilt's School of Religion promoted Social Gospel theology; minister Edgar Gardner Murphy advocated for child labor reform as a Social Gospel cause.

## ★ TENNESSEE CONNECTION

Nashville's Fisk University and Vanderbilt's School of Religion promoted Social Gospel theology, and Tennessee minister Edgar Gardner Murphy championed child-labor reform as a Social Gospel cause.

# Cultural and Economic Impact

- These competing philosophies shaped debates over government's role in addressing inequality.
- Social Darwinism defended the status quo of industrial capitalism, arguing that helping the poor was futile or even harmful.
- The Social Gospel provided moral justification for Progressive Era reforms, arguing that Christians must work for a more just society.
- The tension between these viewpoints continues to shape debates about welfare, regulation, and the proper role of government.

## ★ TENNESSEE CONNECTION

The Social Darwinism vs. Social Gospel debate over government's role reached Tennessee pulpits and campuses, framing how Tennesseans argued about poverty and reform in the Progressive Era.

# The Gospel of Wealth

Andrew Carnegie • 1889

**ZOOM IN** Find ONE detail that surprises you — be ready to name it.

Theodore C. Marceau, 1913 [Library of Congress](#)

*"The problem of our age is the proper administration of wealth, so that the ties of brotherhood may still bind together the rich and poor in harmonious relationship. The conditions of human life have not only been changed, but revolutionized, within the past few hundred years... The contrast between the palace of the millionaire and the cottage of the laborer... measures the change which has come with civilization."*

**CONTEXT**

By 1889, industrialization had created a level of inequality in America that had never existed before. Andrew Carnegie, John D. Rockefeller, and other 'robber barons' had accumulated fortunes worth hundreds of millions of dollars, while the workers in their factories earned barely enough to survive. This extreme concentration of wealth sparked public anger and demands for reform. In response, Carnegie wrote 'The Gospel of Wealth,' arguing that rich men had a moral duty to use their wealth for public benefit — framing philanthropy as the solution to inequality while defending the free-market system that had made him rich.

**ANALYZE**

Compare-and-contrast  
reasoning

**MODEL PROMPT:** Compare how a Social Darwinist and a Social Gospel advocate would each respond to a family living in poverty.

## WORKED EXAMPLE (teacher models this aloud)

**SOCIAL DARWINIST:** Poverty proves the family is unfit — helping them interferes with natural selection and weakens society.

**GOVERNMENT:** Government should stay out. **SOCIAL GOSPEL ADVOCATE:** Poverty is a social problem that Christians are morally obligated to address — through settlement houses, labor reform, and government action.

## THINK ALOUD

*I start by identifying what each philosophy says about the CAUSE of poverty, then trace how that cause leads to a different POLICY conclusion. The contrast isn't just about ideas — it's about what government should DO.*

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

Two brilliant men, both fighting the same racism — but with completely opposite strategies. Which approach would you choose, and why? Hold that question as we dig into one of history's great debates.

# Background and Origins

- Booker T. Washington (1856–1915) was born into slavery in Virginia and founded Tuskegee Institute in Alabama.
- His 1895 Atlanta Compromise speech made him the most prominent African American leader of his era.
- W.E.B. Du Bois (1868–1963) was born free in Massachusetts and became the first African American to earn a Ph.D. from Harvard.
- He authored 'The Souls of Black Folk' (1903) and co-founded the NAACP in 1909.
- Their different origins shaped fundamentally different philosophies about how to advance African American equality.

## SENTENCE FRAME (EL & writing support)

Booker T. Washington believed African Americans should focus on \_\_\_\_\_ first, while W.E.B. Du Bois demanded \_\_\_\_\_ and founded \_\_\_\_\_ to fight for full equality.

Frances Benjamin Johnston, 1902 [Library of Congress](#)

**TEACHER CUE** Chunk → cold-call → confirm before advancing.

# Educational Philosophy

- Washington emphasized vocational and industrial training, believing economic self-sufficiency would gradually earn respect and equal rights.
- Du Bois advocated for classical liberal arts education, especially for the 'Talented Tenth' — the educated elite who would lead the race forward.
- Du Bois argued that limiting education to vocational training would permanently consign African Americans to second-class status, while Washington saw immediate practical skills as the realistic path forward in the hostile post-Reconstruction South.

# Approach to Rights and Equality

- Washington favored accommodation and gradualism, publicly accepting segregation temporarily while quietly working for change through economic development and relationships with white philanthropists.
- He built the 'Tuskegee Machine' — a powerful network that influenced patronage and funding across the country.
- Du Bois demanded immediate civil and political rights, opposing accommodation and founding the Niagara Movement (1905) and later the NAACP to fight segregation through political and legal means.

# Political Strategies Compared

- Washington discouraged political agitation, preferring to build economic power first and trust that social equality would follow.
- Du Bois called Washington's approach a capitulation that sacrificed voting rights, civil equality, and higher education.
- He argued that no people could advance economically without the political power to protect their gains.
- These competing strategies reflect a fundamental historical debate about how oppressed groups should pursue justice — and both left lasting legacies: Tuskegee's industrial education and the NAACP's legal civil rights victories.

**READ CLOSELY** Underline the exact words that answer the ANALYZE question — be ready to read them aloud.

**CONTEXT**

Booker T. Washington gave this speech at the Atlanta Cotton States Exposition on September 18, 1895 — just six months before the Supreme Court's Plessy v. Ferguson decision endorsed segregation. Washington was the most prominent Black leader of his era, founder of the Tuskegee Institute, and his speech was received with enormous praise by white Southerners and many northern whites. He proposed that African Americans should focus on vocational education and economic self-improvement rather than demanding immediate political and civil rights — a strategy designed to make racial progress acceptable to white America during the most dangerous era of racial violence since the Civil War.

- The Patrons of Husbandry (Grange), founded in 1867, was the first major farmers' organization.
- It provided social support and lobbied for railroad regulation.
- By the 1870s, Grangers had won state laws ('Granger laws') capping railroad rates.
- The Farmers' Alliance of the 1880s built on this, creating cooperatives that cut out middlemen and lobbying for government credit programs.
- These organizations laid the groundwork for the Populist Party.

## ★ TENNESSEE CONNECTION

Tennessee farmers joined the Grange and Farmers' Alliance, organizing cooperatives and pressing for railroad regulation — grassroots roots of the Populist movement in the state.

# Farmer vs. Railroad Conflicts

- Railroads exercised monopoly power over farmers by charging high and discriminatory freight rates, offering rebates to large shippers, and controlling grain elevator pricing.
- A farmer in Kansas might pay more to ship wheat 100 miles than an eastern manufacturer paid to ship goods 1,000 miles.
- The Supreme Court initially blocked state regulation (*Wabash v. Illinois*, 1886), but Congress responded with the Interstate Commerce Act (1887), creating the Interstate Commerce Commission — the first federal regulatory agency.

# Populist Reform Demands

- The 1892 Populist Platform demanded government ownership of railroads and telegraphs, a graduated income tax, direct election of senators, the secret ballot, and Free Silver — unlimited coinage of silver to inflate the money supply and ease farmers' debts.
- William Jennings Bryan electrified the 1896 Democratic Convention with his 'Cross of Gold' speech, warning that workers and farmers must not be 'crucified upon a cross of gold.' Though Bryan lost to McKinley, many Populist ideas were later adopted by Progressive Era reformers.

**CONTEXT**

The late 19th century was devastating for American farmers. Falling crop prices, high railroad freight rates, crushing debt, and the deflationary effects of the gold standard squeezed farmers while industrial profits soared. Farmers organized first through the Grange movement and then the Farmers' Alliances before launching the People's (Populist) Party in 1892. At their founding convention in Omaha, Nebraska, the Populists adopted a bold platform calling for government control of railroads, a graduated income tax, direct election of senators, and the free coinage of silver to expand the money supply and help debtors. The Populist movement represented the most significant challenge to Gilded Age capitalism from below.

Evidence-based argument

**MODEL PROMPT:** A farmer in 1892 says: 'The railroads are robbing us.' Is that a claim or a fact? How do we test it?

## WORKED EXAMPLE (teacher models this aloud)

First I distinguish: 'The railroads are robbing us' is a CLAIM — a strong opinion. To test it, I look for evidence: Did railroads charge farmers more than manufacturers? Yes — historical records show farmers paid 2-3x more per mile than large shippers. Does that make it 'robbery'? That's the interpretation question. I'd say it's documented exploitation — whether it's 'robbery' depends on moral framing, but the economic fact is documented.

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

When a company hires a private army to suppress its workers, is that a labor dispute or something more? What responsibility does government have in that situation — and whose side did it take?

# Factors Leading to Labor Organization

- Industrial workers in the late 19th century faced 12–16 hour days, seven-day weeks, dangerous conditions, child labor, and wages that could be cut at the employer's whim.
- Workers had no legal protections, no union contracts, and no recourse when injured.
- The rise of large corporations — Standard Oil, Carnegie Steel, Pullman — concentrated economic power in the hands of a few while workers remained easily replaceable.
- These conditions drove workers to organize for collective protection.

**SENTENCE FRAME** (EL & writing support)

Workers organized \_\_\_\_\_ and used tactics like \_\_\_\_\_ to pressure employers, while management and government responded with \_\_\_\_\_ to break strikes.

Unknown, 1892 [Library of Congress](#)

**TEACHER CUE** Chunk → cold-call → confirm before advancing.

# Union Tactics and Strategies

- Labor unions organized workers to bargain collectively for wages, hours, and safety.
- Primary tactics included strikes — work stoppages to force management to negotiate — as well as boycotts and picket lines.
- The American Federation of Labor (AFL), founded by Samuel Gompers in 1886, focused on skilled trade workers and pursued 'pure and simple' goals: higher wages, shorter hours, better conditions — not socialist revolution.
- The more radical American Railway Union (ARU), led by Eugene V. Debs, organized all railroad workers regardless of craft.

# Key Labor Leaders

- Samuel Gompers (1850–1924) founded and dominated the AFL for nearly four decades.
- His pragmatic approach secured real gains — including the eight-hour workday movement — without challenging capitalism itself.
- Eugene V. Debs (1855–1926) founded the ARU and led the Pullman Strike of 1894.
- When the federal government obtained an injunction to break the strike, Debs was jailed for six months, radicalizing him into socialism.
- He ran for president five times on the Socialist ticket.
- Both men left lasting marks on American labor law and culture.

# Tennessee's Coal Creek Saga and Prison Labor

- In 1891, Tennessee mine operators replaced their paid workers with state convict lease laborers — prisoners leased to private companies as forced, unpaid labor.
- Miners in Coal Creek (now Lake City), Tennessee armed themselves and freed nearly 400 convicts, loading them onto trains to Knoxville.
- The rebellion continued for over a year, with miners repeatedly freeing convict laborers.
- The state ultimately abolished the convict lease system in 1896.
- The Coal Creek War is a pivotal Tennessee connection to the national labor story and the injustice of convict leasing.

## ★ TENNESSEE CONNECTION

In the 1891–92 Coal Creek War, armed Tennessee miners freed nearly 400 leased convicts near Coal Creek (now Lake City); the uprising helped end Tennessee's convict-lease system in 1896.

# Management and Government Responses

- Management responded to strikes with lockouts, Pinkerton detective agencies hired as strikebreakers, blacklisting union members, and court injunctions under the Sherman Antitrust Act.
- The Homestead Strike (1892) — Carnegie Steel vs. steelworkers — ended when Pennsylvania Governor Pattison sent the National Guard after Pinkerton agents clashed with strikers.
- The Pullman Strike (1894) was broken when President Cleveland used a federal injunction and federal troops over the objections of Illinois Governor Altgeld.
- Government generally sided with business in this era, using courts and armies to suppress strikes.

*"What does labor want? **READ CLOSELY** Underline the exact words that answer the ANALYZE question — be ready to read them aloud.

**CONTEXT**

The 1880s and 1890s were a period of intense conflict between industrial workers and the corporations that employed them. Workers in steel mills, coal mines, and factories faced 12-hour workdays, dangerous conditions, child labor, and poverty wages. Samuel Gompers founded the American Federation of Labor (AFL) in 1886 and led it for nearly 40 years, building the most powerful labor organization in American history. Unlike more radical unions, the AFL focused on 'bread and butter' issues — wages, hours, and working conditions — for skilled workers. This 1893 speech showed that Gompers articulated a broader vision of what working people deserved beyond just economic gains.

**ANALYZE**

According to Gompers, what were the broader goals of the labor movement?

# Impact on Consumers, Workers, and Competition

- Monopolies raised prices for consumers by eliminating competition.
- Trusts could drive out smaller competitors through predatory pricing — temporarily selling below cost until rivals went bankrupt, then raising prices again.
- Workers faced worse conditions because single-employer dominance eliminated labor market competition.
- Small business owners could not compete against the economies of scale available to trusts.
- The concentration of wealth in the hands of a few 'robber barons' threatened democratic equality and economic opportunity.

# Sherman Antitrust Act (1890)

- Congress passed the Sherman Antitrust Act in 1890, declaring illegal 'every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce.' It was the first federal law to regulate corporate power.
- However, early enforcement was weak — courts often applied it against labor unions rather than corporations.
- Theodore Roosevelt later used it aggressively against trusts, filing 44 antitrust suits and earning the nickname 'trust-buster.'

# Clayton Antitrust Act (1914)

- The Clayton Antitrust Act of 1914, passed under Woodrow Wilson, strengthened the Sherman Act by specifically prohibiting price discrimination, exclusive dealing contracts, and interlocking directorates (the same people controlling competing companies).
- Critically, it exempted labor unions from antitrust prosecution, recognizing workers' right to organize.
- Labor leader Samuel Gompers called it 'labor's Magna Carta.' Together, the Sherman and Clayton Acts established the framework for federal antitrust enforcement that still governs U.S. business today.

*"Every contract, combination in the form of trust or otherwise, or conspiracy, in restraint of trade or commerce among the several States, or with foreign nations, is declared to be illegal... Every person who shall monopolize, or attempt to monopolize... any part of the trade or commerce among the several States... shall be deemed guilty of a felony."*

**CONTEXT**

By 1890, a small number of giant corporations — called trusts — dominated entire industries in the United States. John D. Rockefeller's Standard Oil controlled 90% of the country's oil refining. Carnegie Steel dominated the steel industry. These monopolies crushed competitors, fixed prices, and exercised enormous political power. Public outrage over the trusts pushed Congress to act. The Sherman Antitrust Act of 1890 was the first federal law to restrict monopolistic business practices, though it was initially used more against labor unions than corporations. Theodore Roosevelt later used it aggressively to break up trusts in the early 1900s.

Cause and effect / legislative reasoning

**MODEL PROMPT:** Standard Oil controls 90% of U.S. oil refining. What happens to prices, workers, and competitors — and why does Congress act?

## WORKED EXAMPLE (teacher models this aloud)

**CAUSE:** Rockefeller eliminates competition through buyouts and predatory pricing. **EFFECT ON PRICES:** No competitors → Standard Oil sets any price it wants. **EFFECT ON WORKERS:** Single employer dominance → take low wages or don't work. **EFFECT ON COMPETITORS:** They're bankrupt or bought out. **WHY CONGRESS ACTS:** Democratic societies can't tolerate one private company controlling basic economic resources — that's economic tyranny, not free market.

## THINK ALOUD

## YOUR TASK

Using the Standard Oil octopus cartoon and the Sherman Antitrust Act excerpt, complete a Before/After organizer: (Before) Describe one way Standard Oil harmed consumers, one way it harmed workers, and one way it eliminated competition. (After) Describe one thing the Sherman Act prohibited, one weakness in early enforcement, and one way the Clayton Act (1914) strengthened it. Then write one sentence: Why did Congress need TWO separate antitrust laws — what did the second one fix that the first one missed?

## DELIVERABLE

Completed Before/After organizer (three rows each side) AND a one-sentence explanation of why the Clayton Act was needed after the Sherman Act already existed.

## DIFFERENTIATION

Entry: Before/After organizer pre-filled with one example in each section; students complete the remaining two rows per section. Final sentence frame: 'The Clayton Act was needed because the Sherman Act \_\_\_\_.' Honors: Evaluate the Standard Oil case (1911): The Supreme Court broke Standard Oil into 34 companies. Was this an effective solution to the monopoly problem? Write two sentences — one arguing yes (with evidence) and one identifying a limitation of the breakup. Then explain which side of the argument you find more historically compelling.

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

When a workplace is so dangerous that locked doors become death traps, who bears responsibility — the employer, the government, the consumer, or all three? This tragedy changed American law forever.

# Industrial Working Conditions

- Factory workers in the Progressive Era faced 10–16 hour days, six or seven days per week, with no overtime pay, no sick leave, no workers' compensation for injuries, and no job security.
- Factories were often dangerous: unguarded machinery, toxic fumes, extreme heat, and falling objects caused thousands of deaths and injuries each year.
- Employers could dismiss workers at will.
- The Triangle Shirtwaist Factory fire of 1911 in New York City — killing 146 workers trapped behind locked doors — became the defining symbol of the era's labor abuses.

**SENTENCE FRAME** (EL & writing support)

*In the early 1900s, workers in \_\_\_\_\_ faced dangerous conditions including \_\_\_\_\_, which the \_\_\_\_\_ tragedy made impossible to ignore.*

# Women in the Industrial Workforce

- Women made up a large portion of the industrial workforce, concentrated in garment factories, textile mills, food processing, and domestic service.
- They were paid significantly less than men for the same work — often half or less.
- They faced sexual harassment, limited advancement, and dismissal if they married or became pregnant.
- Many immigrant women worked in sweatshops — small workshops with especially poor pay and conditions.
- Despite these obstacles, women workers also led some of the most significant labor actions of the era, including the 1909 'Uprising of the 20,000' garment workers strike in New York.

# Child Labor Practices

- Children as young as 5 or 6 worked in coal mines, textile mills, canneries, and glass factories.
- An estimated 1.75 million children under age 15 worked in American industry by 1900.
- They received the lowest wages, performed the most dangerous small-space work in mines, and were exposed to toxic materials without protection.
- Reformer and photographer Lewis Hine documented child labor conditions in powerful photographs that helped build public support for reform.
- The National Child Labor Committee lobbied for protective legislation, which many Southern states resisted.

# The Triangle Shirtwaist Fire

- On March 25, 1911, fire broke out at the Triangle Shirtwaist Factory in New York City.
- The building's exits were locked to prevent theft and unauthorized breaks.
- Workers — mostly young immigrant women — were trapped on upper floors. 146 workers died, either burned or jumping from windows.
- The outrage that followed drove New York State to pass 36 new worker safety laws within three years and prompted national demands for factory safety standards.
- Tennessee garment workers shared these dangerous conditions, and the fire directly accelerated reform efforts across the country.

## ★ TENNESSEE CONNECTION

**CONTEXT**

The Triangle Shirtwaist Factory fire of March 25, 1911 was one of the deadliest industrial disasters in American history. The fire killed 146 garment workers — mostly young immigrant women — because the factory owners had locked the exit doors to prevent theft and unauthorized breaks. Workers were trapped on the upper floors of a Greenwich Village building, and many jumped to their deaths rather than burn. The disaster shocked the nation and catalyzed the labor reform movement, leading to major improvements in New York State's factory safety laws and fueling the growth of the International Ladies' Garment Workers' Union (ILGWU).

Can one book change a nation's laws? Sinclair wanted to expose worker exploitation — but what Americans responded to most was the food safety crisis. Does that say something about what moves people to demand reform?

# The Muckrakers

- Muckrakers were investigative journalists and authors who exposed corruption, corporate abuse, and social injustice.
- President Roosevelt coined the term from Bunyan's 'Pilgrim's Progress' — a man so focused on raking muck he could not look up.
- McClure's Magazine (founded 1893) became the leading platform for muckraking, publishing Tarbell's Standard Oil investigation and Steffens's city corruption exposés simultaneously in 1902.
- Their evidence-based journalism shaped public opinion, built pressure for reform, and demonstrated the power of a free press to hold power accountable.

# Robert M. La Follette and the Wisconsin Idea

- Robert M. La Follette Sr. ('Fighting Bob') transformed Wisconsin into 'the laboratory of democracy.' As governor (1901–1906) and U.S. Senator, he pioneered the direct primary, railroad regulation, and the 'Wisconsin Idea' — using university experts to draft and administer legislation.
- La Follette demonstrated that Progressive reform could work through existing government structures.
- His model was emulated by reformers across the country and anticipated the policy-expert approach that would define 20th-century government.

# Lincoln Steffens and Ida Tarbell

- Lincoln Steffens's 'The Shame of the Cities' (1904) exposed systematic municipal corruption — showing how city governments across America were controlled by political bosses working for business interests.
- Ida Tarbell's two-year investigation of Standard Oil (1902–1904) drew on court records, company documents, and interviews to show how Rockefeller used secret railroad rebates and predatory pricing to eliminate competition.
- Born in the Pennsylvania oil region, she witnessed firsthand how Standard Oil destroyed her father's independent business.
- Her work helped bring about the Supreme Court's 1911 breakup of Standard Oil.

# Upton Sinclair and Theodore Roosevelt

- Upton Sinclair spent seven weeks undercover in Chicago's meatpacking plants and published 'The Jungle' (1906) — a fictional account depicting diseased meat, rat infestations, and worker exploitation.
- He aimed for workers' hearts but hit Americans in the stomach: the book drove the Pure Food and Drug Act and Meat Inspection Act of 1906.
- President Roosevelt, a Progressive Republican, used the power of the presidency to translate muckrakers' findings into law.
- He read 'The Jungle,' ordered his own investigation, and drove the food safety legislation through Congress.
- As Roosevelt said: 'No muckraking without results.'

# Key Figures

**STRATEGY** Documentary investigative journalism

## Lincoln Steffens

Muckraking Journalist

- 'The Shame of the Cities' (1904) exposed systematic corruption in St. Louis, Minneapolis, Pittsburgh, Philadelphia, Chicago, and New York
- Revolutionized investigative journalism at McClure's Magazine; mentored a generation of reform journalists

*"Mr. Rockefeller has systematically played with loaded dice, and it is doubtful if there has ever been a time since 1872 when he has run a race with a competitor and started fair. Business played in this way loses all its sportmanlike qualities. It is fit only for tricksters."*

**CONTEXT**

Ida Tarbell was one of the most important investigative journalists in American history. From 1902 to 1904, she published a 19-part series in McClure's Magazine meticulously documenting how John D. Rockefeller's Standard Oil Company had used secret railroad rebates, industrial espionage, and economic intimidation to crush competitors and build a monopoly controlling 90% of American oil refining. Tarbell's research was devastating — she had personally suffered when Standard Oil destroyed her father's independent oil business. Her series was published as a book in 1904 and directly led to the Supreme Court's 1911 decision breaking up Standard Oil into 34 separate companies.

Argument evaluation / sourcing

**MODEL PROMPT:** Tarbell says Rockefeller used 'force and fraud.' That's a strong claim. How does an investigative journalist prove it?

## WORKED EXAMPLE (teacher models this aloud)

**CLAIM:** Rockefeller used force and fraud. **EVIDENCE TARBELL USED:** 1) Court records showing secret railroad rebates Rockefeller received that competitors didn't. 2) Company documents showing predatory pricing to drive out rivals. 3) Interviews with independent oil producers whose businesses were destroyed. That's three types of evidence — documents, records, testimony. The claim holds because the evidence converges.

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

If the people elected to represent you were actually chosen by wealthy corporations, what would you do? The Progressives had a list of specific reforms to fix democracy itself — let's see what they built.

# Goals of the Progressive Movement

- Progressives sought to use government power to address the economic and social harms of industrialization — reducing the power of corporate trusts, protecting workers and consumers, cleaning up political corruption, and expanding democratic participation.
- They believed that scientific expertise and democratic accountability could make government work for ordinary people.
- Their achievements remade American democracy: by 1920, the federal income tax, direct election of senators, and women's suffrage had all become law through constitutional amendment.

## SENTENCE FRAME (EL & writing support)

Progressives reformed democracy by adopting the \_\_\_\_\_ and \_\_\_\_\_ so citizens could participate more directly, and ratified the \_\_\_\_\_ Amendment to address \_\_\_\_\_.

Jacob Riis, 1888 [Museum of the City of New York](#)

**TEACHER CUE** Chunk → cold-call → confirm before advancing.

# Initiative, Referendum, and Recall

- Progressive reformers developed tools to give voters more direct control over government.
- The initiative allows citizens to propose laws by collecting signatures.
- The referendum allows voters to approve or reject laws passed by the legislature.
- The recall allows voters to remove elected officials from office before their terms expire.
- Together, these reforms reduced the power of political machines and party bosses who had long controlled nominations and legislation.
- By 1914, over twenty states had adopted at least one of these direct democracy tools.

# The Primary System

- Before the Progressive Era, party bosses selected candidates in closed caucuses and conventions — voters had no direct say in who appeared on the ballot.
- Robert La Follette pioneered the direct primary in Wisconsin (1905), allowing voters to choose their party's candidates directly.
- The direct primary spread rapidly across the nation, reducing the power of party machines and making American politics more responsive to ordinary voters.
- By 1916, most states had adopted some form of direct primary for major offices.

# Constitutional Amendments (16th, 17th, 18th)

- Three constitutional amendments reflect Progressive Era achievement.
- The 16th Amendment (1913) gave Congress power to levy an income tax — making the tax system more progressive by taxing wealth rather than consumption.
- The 17th Amendment (1913) required direct election of U.S. senators, removing the power of state legislatures (often controlled by corporate interests) to choose senators.
- The 18th Amendment (1919) prohibited the manufacture and sale of alcohol (Prohibition) — a Progressive and temperance reform that proved impossible to enforce and was repealed in 1933 by the 21st Amendment.

## ★ TENNESSEE CONNECTION

Tennessee ratified the 16th and 17th Amendments as part of the national Progressive wave, joining the reforms that created the federal income tax and direct election of U.S. senators.

*"The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration."*

**READ CLOSELY** Underline the exact words that answer the ANALYZE question — be ready to read them aloud.

## CONTEXT

Before the 16th Amendment (1913), the federal government relied primarily on tariffs (taxes on imported goods) to raise revenue, which placed the tax burden disproportionately on consumers and protected big business. During the Civil War, Congress had briefly imposed an income tax, but the Supreme Court ruled a later income tax unconstitutional in 1895 (*Pollock v. Farmers' Loan and Trust Co.*) because it was not apportioned among states by population. Progressive Era reformers argued that a graduated income tax — where the wealthy paid a higher percentage — was the fairest way to fund the growing federal government. After years of campaigning, the 16th Amendment was ratified in February 1913.

# Let's Work One Together

Compare reform goals to outcomes

**MODEL PROMPT:** Progressives wanted to reduce the power of wealthy interests over government. Look at the 16th and 17th Amendments — how does each one do that?

## WORKED EXAMPLE (teacher models this aloud)

16th Amendment: Before it, the federal government relied on tariffs (taxes on goods) — which hurt poor consumers more than wealthy corporations. An income tax shifts the burden upward — those with more income pay more. That's a direct hit on concentrated wealth. 17th Amendment: Before it, state legislatures chose senators — and corporations could buy state legislatures. Direct election takes senators out of the hands of political machines paid by business.

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

What does it mean for a president to use the power of the federal government to protect ordinary citizens from giant corporations? Is that the government's job? Roosevelt had a very specific answer.

# The Square Deal

- Theodore Roosevelt became the 26th president in 1901 after the assassination of William McKinley.
- His domestic program, the 'Square Deal,' promised fair treatment for all Americans — consumers, workers, and business — without favoring any one class.
- The Square Deal had three core components: conservation of natural resources, control of corporations, and consumer protection.
- Roosevelt believed the president had a duty to use federal power to balance competing interests and protect the public good — a dramatic expansion of executive power over the laissez-faire tradition.

**TEACHER CUE** Chunk → cold-call → confirm before advancing.

# Pure Food and Drug Act and Meat Inspection Act

- After reading Upton Sinclair's 'The Jungle,' Roosevelt ordered an independent investigation of meatpacking conditions.
- The Neill-Reynolds Report (1906) confirmed Sinclair's findings: diseased meat, unsanitary conditions, and falsely labeled products.
- Roosevelt used the outrage to push Congress to pass both the Pure Food and Drug Act and the Meat Inspection Act in 1906.
- These laws created federal standards for food safety, required inspection of meat sold across state lines, and prohibited false labeling — establishing the principle of federal consumer protection that produced today's FDA.

# Trust-Busting Approach

- Roosevelt viewed the Sherman Antitrust Act as an underused tool for public protection.
- He filed 44 antitrust suits against corporations including Standard Oil, American Tobacco, and Northern Securities (a railroad holding company).
- His suit against Northern Securities (won in 1904) established that the president could use the Sherman Act against even the most powerful corporations.
- Unlike previous presidents who had allowed trusts to operate unchecked, Roosevelt distinguished between 'good trusts' (large but fair) and 'bad trusts' (abusive monopolies) — targeting the latter aggressively.

# Conservation Efforts

- Roosevelt was the first environmentalist president.
- He established 150 national forests, 51 federal bird reservations, 4 national game preserves, 5 national parks, and 18 national monuments — protecting 230 million acres of public land.
- He worked with conservationist Gifford Pinchot, chief of the U.S. Forest Service, to manage public land for sustainable use rather than unlimited private exploitation.
- In 1903, Roosevelt camped with naturalist John Muir at Yosemite Valley, returning determined to expand national park protections.
- Tennessee's Great Smoky Mountains National Park was later established with a conservation philosophy Roosevelt helped create.

**CONTEXT**

Theodore Roosevelt became president in September 1901 after the assassination of William McKinley and quickly established himself as the most active, energetic president since Lincoln. His 'Square Deal' domestic program included trust-busting, conservation, and consumer protection. Evidence → conclusion

**MODEL PROMPT:** Roosevelt filed 44 antitrust suits. Does that make him a 'trust-buster' — or just a president doing his job? Does the label matter?

## WORKED EXAMPLE (teacher models this aloud)

**EVIDENCE:** 44 suits, including Northern Securities (the most powerful railroad monopoly). He won key cases. **COMPARISON:** Previous presidents filed almost none. **CONCLUSION:** Relative to his predecessors and to the era's expectation of laissez-faire, 44 suits is genuinely activist. The label 'trust-buster' is historically defensible — but it doesn't mean he wanted to end big business, just control its abuses.

## THINK ALOUD

Roosevelt's Square Deal had three pillars: (1) Conservation of natural resources, (2) Control of corporations, (3) Consumer protection. Using your notes and the Square Deal speech excerpt, fill in a three-pillar evidence chart: for each pillar, identify one specific law or action Roosevelt took AND explain how it fulfilled that pillar of the Square Deal. Then write one sentence: Based on the evidence, do you think Roosevelt was a friend to business, a friend to workers, or a referee between them — and what is your evidence?

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

Two progressives — Roosevelt and Wilson — disagreed about the best way to help ordinary Americans. Roosevelt said 'regulate the trusts'; Wilson said 'break them up.' Which philosophy do you think was right, and does it still matter today?

# The New Freedom Platform

- Woodrow Wilson won the 1912 presidential election in a three-way race against both Republican incumbent William Howard Taft and Progressive Party candidate Theodore Roosevelt.
- Wilson's 'New Freedom' program attacked what he called the 'triple wall of privilege' — high tariffs, monopolistic banks, and industrial trusts.
- Unlike Roosevelt, who wanted to regulate large corporations, Wilson wanted to break them up and restore competition.
- The Underwood Tariff Act (1913) lowered tariffs significantly and, combined with the new income tax from the 16th Amendment, shifted federal revenue away from consumption taxes toward wealth.

**SENTENCE FRAME** *(EL & writing support)*

Wilson's \_\_\_\_\_ platform favored \_\_\_\_\_ over regulation, leading to the creation of the \_\_\_\_\_ to control the money supply.

# Federal Reserve Act (1913)

- Before 1913, the United States had no central banking system.
- Financial panics — especially the Panic of 1907 — revealed the fragility of a banking system controlled entirely by private interests.
- The Federal Reserve Act (1913) created 12 regional Federal Reserve banks under a presidentially appointed Federal Reserve Board.
- The system could adjust the money supply, set interest rates, and serve as a lender of last resort during financial crises.
- Wilson ensured that while banks had input, ultimate control rested with a government-appointed board — making banking 'public, not private,' as he stated.

# National Park Service (1916)

- Although Roosevelt had dramatically expanded protected lands, they were administered by multiple agencies with no coordinating policy.
- The National Park Service Organic Act (1916), signed by Wilson, created a single agency — the National Park Service — to manage parks 'in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.' Tennessee's Great Smoky Mountains National Park, established in 1934, operates under the framework Wilson signed into law.
- The NPS today manages over 400 sites covering 85 million acres.

## ★ TENNESSEE CONNECTION

Tennessee's Great Smoky Mountains National Park, established 1934, operates under the National Park Service framework Woodrow Wilson signed into law with the 1916 Organic Act.

# Additional Wilson Reforms

- Wilson's progressive achievements extended beyond the three major reforms.
- The Clayton Antitrust Act (1914) strengthened antitrust enforcement and exempted labor unions from prosecution.
- The Federal Trade Commission Act (1914) created a regulatory agency to prevent unfair business practices.
- The Adamson Act (1916) established the eight-hour workday for railroad workers — the first federal hours regulation.
- Wilson's presidency brought the Progressive movement to its legislative peak, transforming the federal government into an active regulator of economic life.

The control of the system of banking and of issue should be vested in the Government itself, so that the banks may be the instruments, not the masters, of business."*

**READ CLOSELY** Underline the exact words that answer the ANALYZE question — be ready to read them aloud.

**CONTEXT**

By 1913, banking and monetary policy had become central issues in American politics. The Panic of 1907 had revealed how vulnerable the economy was to bank failures and financial panics — J.P. Morgan personally had to step in with his own money to stabilize the banking system. Populists and progressives argued that the country needed a central banking system controlled by the government, not private bankers. Woodrow Wilson's Federal Reserve Act (1913) created a decentralized federal banking system — the Federal Reserve — that could regulate the money supply and serve as a lender of last resort, placing monetary policy under democratic oversight rather than leaving it to Wall Street.

**ANALYZE**

What was Wilson's goal for banking reform according to this excerpt?

*On August 18, 1920, the Tennessee state legislature cast the deciding vote to ratify the 19th Amendment — and the entire outcome hinged on one 24-year-old representative named Harry T. Burn, who changed his vote because of a note his mother slipped him that morning.*

### DISCUSS

**TIMING:** Turn & Talk 60 sec → cold-call 2 pairs

Tennessee was the 36th and final state needed to ratify — the 'Perfect 36.' What does it mean that a national amendment granting half the population the right to vote came down to one young man's mother in Nashville? Let's trace how suffragists built 72 years of organizing to that single moment.

# Historical Context and Motivations

- Women had been demanding voting rights since the Seneca Falls Convention of 1848, where Elizabeth Cady Stanton and Frederick Douglass led the first women's rights convention in American history.
- After 70 years of activism, women still could not vote in federal elections.
- The suffrage movement drew from multiple motivations: natural rights arguments that democracy required equal representation; Progressive arguments that women voters would support reform legislation; and civil rights arguments that exclusion from the franchise violated American democratic principles.

**SENTENCE FRAME** (EL & writing support)

Leaders like \_\_\_\_\_ and \_\_\_\_\_ organized suffragettes to demand the right to vote, and Tennessee became the '\_\_\_\_\_' when it ratified the 19th Amendment.

# Key Leaders and Their Strategies

- Carrie Chapman Catt led the National American Woman Suffrage Association (NAWSA) and developed the 'Winning Plan' — a coordinated strategy of simultaneous state-level campaigns and federal lobbying.
- She was a disciplined organizer who built NAWSA into a political force with millions of members.
- Alice Paul founded the National Woman's Party and pursued more militant tactics inspired by British suffragettes: parades, White House picketing, hunger strikes, and civil disobedience.
- Anne Dallas Dudley organized Tennessee's suffrage movement, building statewide support that made the 'Perfect 36' possible.
- Their different strategies were complementary — Catt's mass organization built the foundation while Paul's radicalism maintained public attention.

## ★ TENNESSEE CONNECTION

Anne Dallas Dudley of Nashville organized Tennessee's suffrage movement, building the statewide support that later made Tennessee's decisive 'Perfect 36' ratification vote possible.

# Suffragette Activities and Tactics

- Suffragists used a wide range of tactics over seven decades.
- Early campaigns focused on petitions and public lectures.
- By the 1910s, the movement organized massive parades — Alice Paul organized a parade of 8,000 women in Washington D.C. the day before Wilson's 1913 inauguration, which was met with mob violence while police stood by.
- Paul's 'Silent Sentinels' picketed the White House daily from January 1917 forward — the first sustained picket of the White House in American history.
- When picketers were arrested and imprisoned, they went on hunger strikes and endured forced feeding, generating enormous public sympathy.

# The 19th Amendment and Tennessee as the 'Perfect 36'

- The 19th Amendment, granting women the right to vote regardless of sex, passed Congress in June 1919.
- Ratification required 36 of 48 states.
- By August 1920, 35 states had ratified — one short.
- Tennessee became the decisive 36th state.
- The Tennessee General Assembly voted on August 18, 1920.
- The deciding vote was cast by 24-year-old State Representative Harry T. Burn of Niota, Tennessee.
- Burn initially planned to vote against ratification, but his mother Phoebe wrote him a letter: 'Hurrah and vote for Suffrage and don't keep them in doubt!' He changed his vote to 'Aye.' That single vote gave millions of American women the constitutional right to vote.

## ★ TENNESSEE CONNECTION

**CONTEXT**

American women had been fighting for the right to vote since the Seneca Falls Convention of 1848. The suffrage movement suffered setbacks after the Civil War, when the 15th Amendment gave Black men the right to vote but excluded women. By the early 20th century, the movement had revived under leaders like Susan B. Anthony, Elizabeth Cady Stanton, Carrie Chapman Catt, and Alice Paul, who used tactics ranging from state-by-state campaigns to hunger strikes and White House pickets. Tennessee became the crucial 36th state to ratify the 19th Amendment on August 18, 1920 — providing the necessary three-fourths of states — after a dramatic last-minute vote in the state legislature.

## Women's Suffrage

say: WIM-enz SUF-rij

*Sufragio Femenino*

W  
S

The movement to secure voting rights for women, culminating in the 19th Amendment (1920) after more than 70 years of organized activism.

## Carrie Chapman Catt

say: KAIR-ee CHAP-mun KAT

*Carrie Chapman Catt*

C  
C

NAWSA president who developed the 'Winning Plan' — a coordinated state-level and federal strategy that led to the 19th Amendment's ratification.

## Anne Dallas Dudley

say: AN DAL-us DUD-lee

*Anne Dallas Dudley*

A  
D

Tennessee suffragist who founded the Nashville Equal Suffrage League and built statewide organizing that made Tennessee the decisive 'Perfect 36' for ratification.

## 19th Amendment

say: NYNE-teenth uh-MEND-ment

*19ª Enmienda*

1  
A

Ratified on August 18, 1920, this amendment prohibits denying any citizen the right to vote based on sex — extending the vote to women across the United States.

## Alice Paul

say: AL-iss PAWL

*Alice Paul*

A  
P

Militant suffragist who founded the National Woman's Party, organized the 1913 Washington parade, led White House picketing, and endured imprisonment and force-feeding for the cause.

## Perfect 36

say: PER-fikt THUR-tee-siks

*El Perfecto 36*

P3

The nickname for Tennessee's decisive role as the 36th and final state to ratify the 19th Amendment on August 18, 1920 — secured by Harry T. Burn's deciding vote.

# Let's Work One Together

Narrative analysis / significance  
of a single action

**MODEL PROMPT:** Harry Burn changed one vote. How significant was that — and what does it tell us about how change happens?

## WORKED EXAMPLE (teacher models this aloud)

**SCALE:** One vote among 99 Tennessee legislators. But those 99 votes determined whether 36 million women across America could vote. Scale is deceptive — a single action can be world-changing. **CAUSE:** His mother's letter. Does that make it trivial? No — it shows that personal moral influence, even in private, can redirect history. **LESSON:** Big structural change often depends on individual choices made under pressure. Historians study both the structure (the 70-year movement) AND the contingency (what if Burn had voted differently?).

## THINK ALOUD

*Historical causation works at multiple levels simultaneously: the long-term movement created the conditions, but Burn's individual choice sealed the outcome. TCAP rewards students who can connect both levels.*

→ **Now you try:** Write two sentences: one explaining the long-term causes of the 19th Amendment (the movement), and one explaining the immediate cause (what happened in Tennessee on August 18, 1920). Then underline which one a historian would call more important — and defend your choice.

# Suffrage Movement — Strategy, Evidence, and Tennessee's Role

## YOUR TASK

The women's suffrage movement used multiple strategies over 70+ years. Using your notes, the 19th Amendment excerpt, and the Key Figures section, complete a strategy analysis for three leaders: Carrie Chapman Catt, Alice Paul, and Anne Dallas Dudley. For each: (1) What was her strategy? (2) What was her most significant action? (3) What was the outcome of her work? Then write a two-sentence Tennessee Connection: explain the role of Harry T. Burn's vote and Anne Dallas Dudley's organizing in making Tennessee the 'Perfect 36.' Be specific — name the date, the vote, and the letter.

## DELIVERABLE

Three completed leader strategy analyses PLUS a two-sentence Tennessee Connection that names Harry T. Burn, the vote date (August 18, 1920), and Anne Dallas Dudley's organizing role.

## DIFFERENTIATION

Entry: Catt's row pre-completed as a model. Students complete Paul and Dudley rows only. Tennessee Connection sentence frame: 'Anne Dallas Dudley \_\_\_\_, and Harry T. Burn cast the deciding vote on \_\_\_\_ after \_\_\_\_.' Honors: Compare the suffrage movement to one other reform movement studied in Unit 2 (labor, Populism, or Progressivism). Write one paragraph: What did the suffrage movement have in common with your chosen movement (tactics, obstacles, goals), and what was different? Your paragraph must cite at least one primary source from each movement.

## Check your understanding

Analyze the immediate and long-term impacts of women's suffrage on American politics and society.

- A Women's suffrage had no lasting impact, but the historical record tells a more complex story, but the historical evidence paints a more nuanced picture, which contradicts the primary source evidence from this era
- B Women stopped participating in politics after 1920, though this interpretation lacks supporting historical evidence, which ignores significant political and cultural developments of the era
- C Suffrage immediately enfranchised 26 million women, challenged gender roles, supported reforms in education and health, and laid the foundation for later women's rights movements and gender equality advances** ✓ KEY
- D Only electoral politics was affected, but contemporary accounts suggest a different explanation when examined alongside the available primary and secondary sources, but the historical evidence paints a more nuanced picture
