UNIT SUMMARY

In this unit students investigate how railroads, federal land policy, industry, and immigration transformed the United States after Reconstruction — and weigh who benefited and who bore the cost. They read and source primary documents, take guided Cornell notes, build vocabulary, and argue from evidence (CER).

★ **TENNESSEE CONNECTION**

Pap Singleton of Nashville led the **Exodusters** west as Reconstruction collapsed, and **George Jordan** of Williamson County — a Buffalo Soldier — earned the Medal of Honor on the frontier this unit opens. Tennessee is in the story, not a footnote.

WHAT STUDENTS & FAMILIES CAN EXPECT

Over this unit your student will learn to explain westward expansion and its costs, analyze real primary sources (photographs, cartoons, statutes), write evidence-based arguments, and set and track a SMART goal. Every activity has notebook-lined space to write, EN/ES vocabulary support, and clearly marked Entry / On-Level / Extension paths.

CORE PATH — READ ONE CHUNK AT A TIME

Sequence the expansion of the United States. The Homestead Act of 1862 offered 160 acres of free land to settlers who would farm it for five years. Combined with the completion of the Transcontinental Railroad in 1869, these policies accelerated westward expansion as part of Manifest Destiny—the belief that Americans were destined to spread across the continent. The Union Pacific built westward from Omaha while the Central Pacific built eastward from Sacramento, meeting at Promontory Summit, Utah.

Impact on Western Settlement. The Transcontinental Railroad dramatically reduced travel time from months to days, opening the West to settlement, commerce, and resource extraction. Towns sprang up along rail lines, and agricultural products could now reach eastern markets efficiently. However, this expansion came at tremendous cost to American Indian nations whose lands were taken and whose way of life was destroyed.

Impact on American Indians, Immigrants, and Settlers. Western expansion devastated American Indian communities through forced relocations, broken treaties, and the near-extinction of buffalo herds they depended upon. Immigrants, particularly Chinese workers who built much of the Central Pacific, faced discrimination despite their crucial contributions. The "Buffalo Soldiers"—African American cavalry regiments—served on the frontier, including George Jordan of Williamson County, Tennessee, who received the Medal of Honor for his service.

CHOOSE THE BEST ANSWER (CIRCLE A LETTER)

1. Which of the following best describes a direct impact of the Homestead Act of 1862 on settlement patterns in the American West?
 - A. It encouraged settlement by offering 160 acres of public land to citizens who agreed to farm it for five years
 - B. It restricted western migration by requiring settlers to purchase land at market prices from the federal government
 - C. It redirected migration to the Pacific Coast by offering free land only in Oregon and Washington territories
 - D. It promoted settlement exclusively among formerly enslaved people as part of Reconstruction land redistribution
2. Which of the following best describes the relationship between Manifest Destiny ideology and the construction of the Transcontinental Railroad?
 - A. The railroad construction disproved the concept of Manifest Destiny
 - B. Manifest Destiny provided the philosophical justification while the Transcontinental Railroad provided the practical means for westward expansion
 - C. The railroad was built to prevent further westward expansion
 - D. Manifest Destiny and railroad construction were unrelated historical
3. Which of the following was a direct consequence of the Homestead Act of 1862?
 - A. The immediate elimination of sharecropping in the post-Civil War South
 - B. Guaranteed land rights for American Indian nations living in the western territories
 - C. Rapid settlement of the Great Plains by small farmers who claimed 160-acre plots of free federal land
 - D. The federal purchase of plantations in the South to redistribute to freed people

Activity 4 · Close Read · key terms first, then evidence

CORE PATH — READ ONE CHUNK AT A TIME

Movement to Reservations. After the Civil War, the federal government expanded a policy of confining American Indian nations to reservations—designated territories far smaller than their traditional homelands. Officials stated two goals: to open western land for white settlement and railroads, and to end armed conflict on the Plains. Many treaties were signed under military and economic pressure, and tribes surrendered millions of acres. Resistance continued: at the Battle of the Little Bighorn (1876), Lakota and Cheyenne forces under Sitting Bull and Crazy Horse defeated Lt. Col. George Custer—a Native victory that intensified U.S. efforts to break tribal power.

Assimilation and Boarding Schools. Alongside removal, the government pursued a policy of assimilation—using schools and law to replace tribal cultures with Euro-American ones. At off-reservation boarding schools such as the Carlisle Indian Industrial School (founded 1879), Captain Richard H. Pratt summarized the aim in 1892: “Kill the Indian in him, and save the man.” Children were removed from their families and often forbidden to speak their languages, wear their clothing, or practice their religions. Historians today describe this systematic effort to erase Native identity as cultural genocide, and document its lasting, multi-generational harm.

The Dawes Act and Its Impact. The Dawes Severalty Act of 1887 broke up communal tribal lands into individual allotments—160 acres to each head of a family—stating the goal of turning American Indians into independent farmers and U.S. citizens. The actual effect was a massive transfer of land: American Indians held about 150 million acres before the Act, and lost roughly two-thirds of their land base—over 90 million acres—by 1934. “Surplus” land was sold to white settlers, and additional allotted land was lost through taxation, fraud, and forced sales. The Act dismantled the communal landholding central to many tribal cultures.

CORE PATH — READ ONE CHUNK AT A TIME

The Election of 1876 and End of Reconstruction. The disputed 1876 presidential election between Republican Rutherford B. Hayes and Democrat Samuel Tilden led to the Compromise of 1877. In exchange for the presidency, Hayes agreed to withdraw federal troops from the South, effectively ending Reconstruction. This abandonment left African Americans without federal protection against increasingly hostile state governments.

Jim Crow Laws, Lynching, and Disenfranchisement. With federal protection gone, Southern states implemented Jim Crow laws enforcing racial segregation in all aspects of life. African Americans faced systematic disenfranchisement through poll taxes, literacy tests, grandfather clauses, and white primaries. Those who resisted faced terrorism, including lynching—public murders that went unpunished and were often celebrated by white communities.

Pap Singleton and the Exodusters. Benjamin "Pap" Singleton, a formerly enslaved man, organized the migration of thousands of African Americans from the South to Kansas in 1879. These "Exodusters" sought to escape violence and oppression, establishing communities like Nicodemus, Kansas. While conditions in Kansas were often harsh, the Exoduster movement represented African American agency and resistance to Jim Crow terror.

Plessy v. Ferguson and "Separate But Equal". The 1896 Supreme Court decision in Plessy v. Ferguson established the "separate but equal" doctrine, ruling that racial segregation was constitutional as long as facilities were supposedly equal. In practice, facilities for African Americans were grossly inferior. This decision legitimized Jim Crow segregation for nearly sixty years until Brown v. Board of Education (1954).

1. Which disenfranchisement method was specifically designed to prevent African Americans from voting while allowing most poor whites to maintain voting rights?

- A. Property ownership requirements for most voters
- B. Age restrictions that raised the voting age to 25
- C. Literacy tests combined with grandfather clauses
- D. Poll taxes that affected citizens across income levels

2. Which of the following best explains how the Compromise of 1877 contributed to the end of Reconstruction?

- A. It gave Southern states greater congressional representation in exchange for ratifying the 14th Amendment
- B. It established the Freedmen's Bureau as a permanent federal agency to protect formerly enslaved people
- C. It required Southern states to hold new elections supervised by Northern military commanders before rejoining the Union
- D. It resolved the disputed 1876 presidential election by awarding the presidency to Hayes in exchange for withdrawing federal troops from the South

3. Which method was most widely used by Southern state governments to disenfranchise African American voters after Reconstruction?

- A. Poll taxes that required payment to vote, which most poor freedmen could not afford
- B. Federal laws that restricted Black citizens to voting only in local elections
- C. State constitutional amendments that directly repealed the 15th Amendment in the South
- D. A federal executive order that removed Black voters from registration rolls

Political Machines and Boss Tweed. The Gilded Age (1870s-1900) saw the rise of powerful political machines that controlled city governments through patronage and corruption. Boss Tweed's Tammany Hall in New York City epitomized this system, funneling millions in public funds to Tweed and his associates. Political cartoonist Thomas Nast exposed Tweed's corruption through devastating illustrations in Harper's Weekly.

Major Scandals and the Spoils System. The era was marked by corruption at all levels. The Crédit Mobilier scandal revealed that railroad executives and congressmen had profited enormously from fraudulent construction contracts. The spoils system—giving government jobs to political supporters regardless of qualification—reached its peak. President James Garfield's assassination by a disappointed office-seeker in 1881 finally prompted reform.

Civil Service Reform. Garfield's assassination led to the Pendleton Civil Service Act of 1883, which established merit-based hiring for federal positions through competitive examinations. This began the long process of professionalizing government service, though political influence remained significant in many positions.

Economic Disparity. The Gilded Age saw extreme wealth concentration among industrial capitalists while farmers struggled with falling crop prices, high railroad shipping rates, and debt. Wage earners faced dangerous working conditions, long hours, and low pay. The Interstate Commerce Act of 1887 attempted to regulate railroad rates, representing early federal intervention in the economy.

1. Thomas Nast's political cartoons were significant during the Gilded Age because they:

- A. Supported the policies of political machines like Tammany Hall
- B. Promoted the expansion of the spoils system in government hiring
- C. Encouraged immigrants to participate more actively in politics
- D. Exposed political corruption and influenced public opinion against

2. How did President James Garfield's assassination in 1881 contribute to the passage of the Pendleton Civil Service Act of 1883?

- A. Garfield's assassin was a disappointed office-seeker, and public outrage over the spoils system created political pressure for merit-based hiring reform
- B. Garfield had personally drafted the Pendleton Act before his death, and Congress passed it as a memorial tribute
- C. The assassination revealed corruption within the Treasury Department, prompting Congress to overhaul federal contracting practices
- D. President Arthur used the assassination as justification to reorganize the entire executive branch under military command

3. What problem was the Interstate Commerce Act of 1887 primarily designed to address that the Pendleton Civil Service Act of 1883 did not?

- A. Political corruption among federal government employees who accepted bribes from private businesses
- B. Unfair railroad pricing practices, including rate discrimination and secret rebates that harmed farmers and small businesses
- C. The concentration of industrial wealth among a small number of Gilded Age monopolists in manufacturing
- D. The exploitation of immigrant workers in railroad construction through low-wage labor practices

Technological Innovations. The late 19th century saw transformative inventions that reshaped American life. Alexander Graham Bell's telephone (1876) revolutionized communication. Thomas Edison's electrical systems and light bulb brought power to homes and factories. Nikola Tesla's alternating current system enabled long-distance electrical transmission. Henry Bessemer's steel process made skyscrapers and modern infrastructure possible.

Industrial Titans. Andrew Carnegie built a steel empire through vertical integration, controlling every step from iron mines to finished products. John D. Rockefeller's Standard Oil pioneered horizontal integration, buying out competitors to dominate the oil industry. J.P. Morgan wielded enormous financial power, reorganizing railroads and creating U.S. Steel. Cornelius Vanderbilt consolidated railroad networks, enabling national commerce.

African American Entrepreneurs. Despite facing discrimination, African American entrepreneurs made significant contributions. Madam C.J. Walker became America's first female self-made millionaire through her hair care products, employing thousands of Black women. George Washington Carver's agricultural research at Tuskegee Institute developed hundreds of products from peanuts and sweet potatoes, helping diversify Southern agriculture.

Major Industrial Centers. Industrialization concentrated in cities with geographic advantages. Pittsburgh became the steel capital due to access to coal, iron ore, and rivers. Chicago emerged as a railroad hub and meatpacking center. New York City dominated finance and trade through its port. Boston led in textiles and manufacturing. San Francisco served as the gateway to Pacific trade and western resources.

Rural-to-Urban Migration. Industrialization drew millions from farms to cities seeking factory jobs. The promise of wages attracted both native-born Americans and immigrants. Cities grew explosively—Chicago's population increased from 30,000 in 1850 to over 1 million by 1890. This rapid growth created overcrowded tenements, inadequate sanitation, and new social challenges.

Geographic Factors in Industrial Location. Industries located based on access to raw materials, transportation, markets, and labor. Steel mills clustered near coal and iron deposits. Textile mills used water power and later concentrated near ports for cotton imports. Meatpacking centered in Chicago due to railroad connections to cattle ranges and eastern markets. These patterns shaped regional development for generations.

US.07 — Immigration: Old vs. New Immigrants

Opener · before you learn

LEARNING TARGET (I CAN...)

I can describe the differences between "old" and "new" immigrants; explain entry points (Ellis Island and Angel Island), push and pull factors, and the formation of ethnic clusters; and analyze nativism and restrictions such as the Chinese Exclusion Act and the Gentlemen's Agreement on American society.

LENSES (THIS STANDARD'S DIMENSIONS)

SET YOUR SMART GOAL — MY SHORT-TERM GOAL FOR THIS STANDARD

Write a goal that is Specific · Measurable · Achievable · Relevant · Time-bound.
Example: "By Friday I can explain immigration: old vs. new immigrants using two pieces of evidence."

HOOK — READ THIS

"Old" immigrants (pre-1880) came primarily from Northern and Western Europe—Britain, Ireland, Germany, Scandinavia. What surprises you? What do you want to know?

PREVIEW & PREDICT

Skim the standard. Predict who benefited and who bore the cost.

Activity 4 · Close Read · key terms first, then evidence**CORE PATH — READ ONE CHUNK AT A TIME**

Old and New Immigrants. "Old" immigrants (pre-1880) came primarily from Northern and Western Europe—Britain, Ireland, Germany, Scandinavia. They often spoke English or related languages and were predominantly Protestant. "New" immigrants (1880-1920) came from Southern and Eastern Europe—Italy, Poland, Russia, Greece—as well as Asia. They brought different languages, religions (Catholic, Orthodox, Jewish), and customs that many Americans viewed with suspicion.

Entry Points and the Assimilation Process. Ellis Island in New York Harbor processed millions of European immigrants, while Angel Island in San Francisco served Asian immigrants with far more restrictive procedures. New immigrants faced difficult assimilation: language barriers, discrimination, and unfamiliar customs. Jane Addams's Hull House in Chicago pioneered settlement houses that helped immigrants learn English, navigate American systems, and maintain cultural connections.

Push and Pull Factors. Push factors drove people from their homelands: religious persecution (especially of Jews in Russia), poverty, political upheaval, and lack of opportunity. Pull factors attracted them to America: economic opportunity, religious freedom, land availability, and established immigrant communities. Letters from successful immigrants encouraged others to follow.

Nativism and Restriction. The rise of nativism—hostility toward immigrants—led to restrictive legislation. The Chinese Exclusion Act of 1882 banned Chinese immigration for ten years (repeatedly renewed until 1943). The Gentleman's Agreement of 1907 limited Japanese immigration. Jacob Riis's photographs and writings, including "How the Other Half Lives," exposed immigrant living conditions, prompting both sympathy and nativist fears.

THESIS MINI-LESSON — HOW TO WRITE A THESIS

A thesis takes a position and previews your reasons: “Although ___, the bigger effect was ___ because ___.” You’ll carry this thesis into Activity 7 (CER).

Text-dependent question	Evidence from the passage	What it shows
Main idea of “Old and New Immigrants” + the evidence that supports it		
Main idea of “Entry Points and the Assimilation Process” + the evidence that supports it		
Main idea of “Push and Pull Factors” + the evidence that supports it		
Main idea of “Nativism and Restriction” + the evidence that supports it		

ACT Connection · Reading — main idea + evidence is exactly the ACT Reading skill.

Activity 5 · Primary Source / HIPPO · source it first

SOURCE IT FIRST

Before analyzing, source the document: who made it, when, and why. Then work the HIPPO frame and answer in a complete CER.

HIPPO move	What I notice
Historical context — what was happening when this was made?	
Intended audience — who was meant to see it?	
Point of view — whose perspective, and what is left out?	

HIPPO move	What I notice
Purpose — why was it created?	
Outside evidence — what do I already know that connects?	

CONFIDENCE CHECK-IN
Rate your sourcing 1–4. What would move you up one level?

Future Ready · Civic responsibility — weighing evidence fairly is a citizen’s skill.

Activity 6 · Practice Quiz · commit first, then check**CHOOSE THE BEST ANSWER (CIRCLE A LETTER)**

1. Which of the following was a major challenge faced by 'new' immigrants — those arriving from Southern and Eastern Europe — in assimilating into American society during the late 1800s and early 1900s?

- A. Federal law required new arrivals to return to their home countries after working in the United States for five years
- B. Established immigrant communities welcomed newcomers and immediately provided them with employment and comfortable housing
- C. Language barriers, cultural differences, and nativist discrimination made social and economic integration difficult
- D. The federal Bureau of Immigration assigned new immigrants to specific professions based on their nationality

2. How did the immigration experience at Angel Island differ from the experience at Ellis Island?

- A. Angel Island processed European immigrants while Ellis Island processed Asian immigrants, but both had equally welcoming procedures
- B. Angel Island was known for rapid processing of immigrants who were immediately granted citizenship upon arrival
- C. Both stations imposed equally rigorous detention and interrogation on all arriving immigrants regardless of national origin
- D. Ellis Island processed primarily European immigrants with relatively brief inspections, while Angel Island subjected Asian immigrants — especially Chinese — to prolonged detention and intensive interrogation

3. What was the primary difference between "old" and "new" immigrants?

- A. New immigrants came from Southern and Eastern Europe with different languages and religions
 - B. Old immigrants were wealthier, but the historical record tells a more complex story
 - C. Old immigrants faced more discrimination, though this interpretation lacks supporting historical evidence
 - D. New immigrants were all skilled workers, which does not align with the documented historical record

SELF-CHECK KEY (COMMIT YOUR ANSWERS FIRST!)

- 1. C** — “Language barriers, cultural differences, and nativist discrimination made social and economic integration difficult” is correct; the other options misstate a fact or overreach.
- 2. D** — “Ellis Island processed primarily European immigrants with relatively brief inspections, while Angel Island subjected...” is correct; the other options misstate a fact or overreach.
- 3. A** — “New immigrants came from Southern and Eastern Europe with different languages and religions” is correct; the other options misstate a fact or overreach.
