

GOVERNMENT HACK™

Unit Assessment Book

Unit 3 — The Legislative Branch · Teacher Edition

HOW TO USE THIS BOOK

Three parts: (1) Formative Checkpoints — a short check per standard for progress monitoring (MTSS); (2) Unit Summative — two parallel forms (A and B) for pre/post or retakes; (3) Teacher Answer Key + Item Analysis + Reteach.

All items are pulled from the Government Hack question bank. Assessment items are classroom-formative · pre-field-test.

Administering these forms is what generates the response data to CALIBRATE the pre-calibrated items — the first cycle of use closes the loop.

Keys and reteach live in this teacher book only — reproduce the student sections (formative + Form A/B) without the key section.

ABOUT THESE NUMBERS

Every item carries a cognitive-rigor classification (Webb's DOK × Bloom's, located on the Hess Cognitive Rigor Matrix) and a pre-calibration IRT 3PL estimate: a = discrimination, b = difficulty, c = pseudo-guessing.

These IRT parameters are DESIGN-TIME ESTIMATES, not empirical calibrations. IRT 3PL parameters are pre-field-test design-time estimates, to be calibrated on field-test data. Assessment items are classroom-formative · pre-field-test.

Distractor codes: PK prior-knowledge · MC misconception · PE partial evidence · NE nearby error · CA causal attribution · AN anachronism · OG overgeneralization.

Part 6 — UDL Supports & Remediation (Teacher)

UNIVERSAL DESIGN FOR LEARNING (UDL 3.0) SUPPORTS — APPLIES TO EVERY ITEM

These supports vary the MEANS of access, not the mastery target. They apply to every item on the formative checkpoints and both summative forms.

Representation — CAST 3.0 Rep — key terms glossed (EN/ES); read-aloud on request; large-print/screen-reader friendly

Action & Expression — [MC] respond by selecting/pointing/AT · [open] respond in writing, speech, or a labeled diagram; word processor/speech-to-text available

Engagement — action-oriented feedback via the remediation routing; DOK-tiered challenge

Supports vary the means, not the mastery target — UDL design, not modification. CAST (2024). Universal Design for Learning Guidelines version 3.0.

HOW TO USE THIS SECTION

For each item: if a student misses it, start with the If-missed reteach, then route by the SPECIFIC wrong choice the student picked (each distractor signals a distinct misconception), and escalate through MTSS Tier 2 → Tier 3 if the misconception persists across parallel forms. Assessment items are classroom-formative · pre-field-test.

Form A — UDL & distractor-based remediation

Item 1 — GC.35 · DOK 2

If missed: Revisit “Citizenship & Naturalization” using the unit's Cornell notes + the standard's graphic organizer; re-check with the Exit Ticket, then re-assess with a parallel-form item.

Wrong choice	Signals misconception	Targeted reteach
A	Misconception — Congress sets the rule; it does not naturalize individuals one by one.	confront the misconception with a worked counter-example
C	Misconception conflicting with 14th Amendment birthright citizenship.	confront the misconception with a worked counter-example
D	Overgeneralization — the civics test applies to applicants, not all citizens.	test the overgeneralization against a counter-case

MTSS ROUTING

Tier 2 — Small-group (Tier 2) reteach targeting the signaled misconception (10–15 min, organizer + worked example), then re-assess with a parallel item.

Tier 3 — If it persists across parallel forms (Tier 3): intensive 1:1 with concrete→representational→abstract scaffolding + think-aloud; progress-monitor weekly toward the same standard.

Item 2 — GC.10 · DOK 2

If missed: Revisit “Article I & the 17th Amendment” using the unit's Cornell notes + the standard's graphic organizer; re-check with the Exit Ticket, then re-assess with a parallel-form item.

Wrong choice	Signals misconception	Targeted reteach
B	Nearby error — term lengths are reversed.	contrast the near-miss with the precise answer
C	Misconception — the chambers differ in both term length and size.	confront the misconception with a worked counter-example
D	Misconception — members do not serve life terms.	confront the misconception with a worked counter-example

MTSS ROUTING
