REQUIREMENTS

30

MEETS

10

EXCEEDS

0

IN BREACH

Every requirement below is backed by **resolvable evidence** in the product or curriculum — never an assertion. The machine guardrail `verify_wcs_compliance.py` fails the build if any requirement is unmet or any cited evidence cannot be resolved, so this matrix cannot drift from the verified truth. **MEETS** = the requirement is satisfied; **EXCEEDS** = History Hack goes beyond it (the Platinum bar: better, not parity). Generated from `requirements.json`.

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
EDUCATOR BLUEPRINT		
BP-PLAN WCS Technology Use Guidance — Educator Blueprint, Phase 1: Plan with Purpose	Educators plan technology use around a clear learning goal and select tools deliberately, pedagogy-first.	The lesson-plan builder is goal-first: every activity is tagged with its high-impact strategy and effect size, and the teacher selects activities against their TEAM rubric, pacing guide, and class times before any tool is chosen. Technology enters the flow only when it passes the Educational-Impact Gate. EXCEEDS DOCTRINE <code>00_START_HERE/PRODUCT_MODEL_DOCTRINE.md</code> DOCTRINE <code>00_START_HERE/Frameworks_Canon.md</code> APP CODE <code>lib/lesson-package/tech-plan.ts</code> LIVE ROUTE <code>/teacher-tools/lesson-package</code>
BP-TEACH WCS Technology Use Guidance — Educator Blueprint, Phase 2: Teach with Intention	Technology use is intentional during instruction: active over passive, defined duration, non-digital methods preferentially leveraged for conceptual understanding.	Print-first by design: the student workbook is the spine and paper carries conceptual understanding; the app amplifies only where paper physically cannot. Each digital touch has a defined duration in the tech plan, and student use is active (write a CER on paper, self-grade, input to app, revise). EXCEEDS DOCTRINE <code>00_START_HERE/PRODUCT_MODEL_DOCTRINE.md</code> APP CODE <code>lib/lesson-package/tech-plan.ts</code> APP CODE <code>lib/usage/meaningful-use.ts</code>

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
BP-REFLECT WCS Technology Use Guidance — Educator Blueprint, Phase 3: Reflect & Respond	Educators reflect on efficacy using data and respond (reteach, adjust) based on evidence of learning.	The platform's reason-for-being is the parallel test-data analytics + real-time standard-mastery + auto-remediation loop, rolled up at district/PLC/teacher/student. Teachers see mastery by standard and reteach from the data. MEETS DOCTRINE 00_START_HERE/ PRODUCT_MODEL_DOCTRINE.md DOCTRINE 00_START_HERE/ ADOPTION_VALUE_CASE.md APP CODE lib/district-item-analysis.ts LIVE ROUTE /district
AREA OF FOCUS 1 — SAFETY, PRIVACY & APPLICATION VETTING		
A1-AUG WCS Technology Use Guidance — Area 1; WCS Acceptable Use Guidelines (AUG)	Adhere to the WCS Acceptable Use Guidelines.	History Hack is a closed-loop, ad-free, child-safe environment: first-party self-hosted video with no link-outs, no recommendations, comments, or ads, so a student cannot hop from a lesson to the open web — the core AUG posture for CIPA/COPPA/FERPA. MEETS DOCTRINE CLAUDE.md APP CODE lib/compliance/sourcing.ts LIVE ROUTE /trust
A1-PRIVACY WCS Technology Use Guidance — Area 1 (FERPA/ COPPA/CIPA); References: US DoE FERPA, FTC COPPA, FCC CIPA	Comply with FERPA, COPPA, and CIPA for student data privacy and safety.	FERPA/COPPA/CIPA posture is documented and published: trust center, privacy policy, vendor-security disclosures, and a sub-processor audit. The IRT calibration pipeline is FERPA/COPPA-safe. No student PII is exposed to third-party players. MEETS CONTENT 06_COMPLIANCE_INTERNAL/ compliance.html APP CODE app/privacy/page.tsx APP CODE app/vendor-security/page.tsx APP CODE app/sub-processor-audit/ page.tsx LAW/FRAMEWORK FERPA 20 U.S.C. 1232g; COPPA 16 CFR 312; CIPA 47 U.S.C. 254(h)

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
A1-VET WCS Technology Use Guidance — Area 1 (LearnPlatform vetting, standards alignment + research-based evidence of learning, 5-year re-vet)	Applications are vetted (LearnPlatform), aligned to standards, and supported by research-based evidence of learning; re-vetted on a defined cycle.	History Hack supplies a complete vetting dossier: full US.01-US.95 standards alignment, ESSA/research evidence tiering, a VPAT/ACR, and a data-privacy agreement — everything a LearnPlatform review needs. The Administrative Review runs quarterly so alignment stays current through any re-vet. MEETS CONTENT 05_STANDARDS_ALIGNMENT CONTENT 06_COMPLIANCE_INTERNAL/ADMINISTRATIVE_REVIEW.md APP CODE docs/compliance/VPAT-2.5-ACR.md APP CODE docs/compliance/content-governance-policy.md
A1-PORTAL WCS Technology Use Guidance — Area 1 (public family-facing portal of vetted apps)	A public, family-facing portal makes vetted applications and their safeguards transparent to families.	The district owns the portal; History Hack supplies the transparency artifacts that populate it — a public approach/technology-use ledger, a trust center, and content-governance disclosures families can read without logging in. MEETS DOCTRINE 00_START_HERE/ADOPTION_VALUE_CASE.md APP CODE app/approach/page.tsx APP CODE app/trust/page.tsx APP CODE app/content-governance/page.tsx LIVE ROUTE /approach
AREA OF FOCUS 2 — INSTRUCTIONAL TECHNOLOGY BEST PRACTICES		
A2-FRAMEWORKS WCS Technology Use Guidance — Area 2 (names the Bold School Framework and PICRAT); References: Kieschnick (2018) Bold School, Kimmons/ Graham/West PICRAT	Instructional technology decisions use the Bold School Framework and PICRAT.	The exact frameworks WCS names are the ones History Hack ships: the SAMR/PICRAT/BOLD/TPACK registry is the single source of truth for how and why each feature uses technology, with an honesty rule that a feature is never badged a higher cell than it earns. The public ledger surfaces this so anyone can audit it. EXCEEDS DOCTRINE 00_START_HERE/FRAMEWORKS_CANON.md APP CODE lib/samr/samr-registry.ts APP CODE components/picrat/picrat-chip.tsx APP CODE app/approach/page.tsx LAW/FRAMEWORK Kieschnick, W. (2018) Bold School (Corwin); Kimmons, Graham & West, PICRAT (EdTech Books)

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
A2-PEDAGOGY WCS Technology Use Guidance — Area 2 (pedagogy-first; tool serves the learning goal)	Pedagogy leads; technology is used only when it enhances learning, not for its own sake.	The tech-value rule is a hard gate: technology ships only if it clears the Educational-Impact Gate (a named high-impact strategy with a research effect size at or above Hattie's hinge d ~ 0.40 that print physically cannot deliver). SAMR/TPACK describe the kind of integration; they are not the value bar. EXCEEDS DOCTRINE 00_START_HERE/FRAMEWORKS_CANON.md DOCTRINE 00_START_HERE/PRODUCT_MODEL_DOCTRINE.md APP CODE lib/samr/samr-registry.ts
A2-PRINTFIRST WCS Technology Use Guidance — Area 2 (non-electronic/print prioritized); References: Marano et al. (2025) handwriting vs typing; Horvath, laptops and brains	Non-electronic, print-based methods are prioritized, especially for foundational and conceptual learning.	History Hack is a print-first product: the workbook is the spine and everything is printable — 'the foundation of the platform.' The page must stand alone; the app raises the ceiling, never lowers the floor. This aligns with the writing-neuroscience evidence WCS cites (handwriting for encoding). EXCEEDS DOCTRINE 00_START_HERE/PRODUCT_MODEL_DOCTRINE.md DOCTRINE 00_START_HERE/BUILD_STANDARD.md LAW/FRAMEWORK Marano et al. (2025) Life 15(3):345, doi:10.3390/life15030345
A2-DURATION WCS Technology Use Guidance — Area 2 (defined start-stop duration for tech use)	Technology use has a defined start and stop; time-on-device is bounded and intentional.	The lesson-package tech plan assigns a defined duration (minutes) to each digital touch, so device time is explicit and bounded rather than open-ended. MEETS DOCTRINE 00_START_HERE/PRODUCT_MODEL_DOCTRINE.md APP CODE lib/lesson-package/tech-plan.ts APP CODE lib/usage/meaningful-use.ts APP CODE components/usage/meaningful-use-panel.tsx
A2-PAPER-ASSESS WCS Technology Use Guidance — Area 2 (paper available during digital assessments)	Paper is available during digital assessments (e.g., scratch/annotation).	Every assessment item and test in History Hack is printable, and the workbook-to-app loop assumes the student writes on paper first. Paper forms of every test exist as distribution artifacts (parallel forms packet, printable test bank). MEETS DOCTRINE 00_START_HERE/PRODUCT_MODEL_DOCTRINE.md CONTENT 04_ASSESSMENTS LIVE ROUTE /practice

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
AREA OF FOCUS 3 — INTENTIONAL STUDENT TECHNOLOGY USE		
A3-ACTIVE WCS Technology Use Guidance — Area 3 (active over passive use)	Student technology use is active (creating, analyzing) rather than passive (consuming).	The meaningful-use model distinguishes active from passive use and the workbook-to-app loop is built around student production (write, self-grade, revise). PICRAT 'passive' cells are never badged as transformative. MEETS DOCTRINE 00_START_HERE/ PRODUCT_MODEL_DOCTRINE.md APP CODE lib/usage/meaningful-use.ts APP CODE lib/samr/samr-registry.ts
A3-IEP504 WCS Technology Use Guidance — Area 3 and Appendix (IEP/ 504/ILP exceptions); References: CRS (2025) rights under IDEA, Section 504, ADA	Students with an IEP, 504 plan, ILP, documented health need, or assistive- technology need retain uninterrupted access as an exception.	IEP/504 support profiles are a first-class feature-flag, and the accommodations crosswalk maps supports to each need. UDL 3.0 supports add paths without lowering the goal, and the product carries a VPAT/ACR for assistive-technology interoperability. MEETS DOCTRINE 00_START_HERE/ FRAMEWORKS_CANON.md APP CODE lib/feature-flags/iep504- support-profiles.ts APP CODE lib/accommodations- crosswalk.ts APP CODE docs/compliance/VPAT-2.5- ACR.md
A3-EFFICACY WCS Technology Use Guidance — Area 3 (evidence of efficacy required); References: Hattie Visible Learning MetaX	Technology use is supported by evidence of efficacy; effect on learning is demonstrable.	The Educational-Impact Gate IS an evidence-of-efficacy gate: a feature must clear an effect size at or above Hattie's hinge ($d \sim 0.40$) and be something print cannot do. Effect sizes come from cited canonical sources (Hattie, Black & Wiliam) — never fabricated. EXCEEDS DOCTRINE 00_START_HERE/ FRAMEWORKS_CANON.md DOCTRINE 00_START_HERE/ ADOPTION_VALUE_CASE.md LAW/Framework Hattie, Visible Learning MetaX (visiblelearningmetax.com)

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
A3-SCREENLIMIT WCS Technology Use Guidance — Area 3 (age-appropriate screen limits, e.g., K-2 max 60 min/day; no tech at recess); References: AAP, Cedars-Sinai, Haidt, Common Sense	Screen time is age-appropriate and minimized; grade-band limits are honored.	History Hack is a grades 9-12 U.S. History product, so the K-2 numeric cap does not apply; the underlying principle — minimize passive screen time — is exceeded by the print-first model, where the default medium is paper and each digital touch is duration-bounded. EXCEEDS DOCTRINE 00_START_HERE/ PRODUCT_MODEL_DOCTRINE.md APP CODE lib/lesson-package/tech-plan.ts LAW/Framework AAP Council on Communications and Media (2026) Pediatrics 157(2); Haidt (2024) The Anxious Generation
A3-DATA WCS Technology Use Guidance — Area 3 (PLT/PLC data review; ClassLink analytics to families)	Professional Learning Teams review technology-use data; usage analytics are shared with families (e.g., via ClassLink).	Mastery and item analytics roll up at district/PLC/teacher/student levels for PLC review, and the product supports ClassLink SSO + OneRoster so analytics flow through the district's family-facing rostering layer. MEETS DOCTRINE 00_START_HERE/ ADOPTION_VALUE_CASE.md APP CODE lib/district-item-analysis.ts APP CODE lib/sso/classlink.ts APP CODE lib/oneroster/sync.ts
AREA OF FOCUS 4 — TRAINING AND SUPPORT		
A4-PL WCS Technology Use Guidance — Area 4 (professional learning models plan/select/implement/reflect)	Professional learning models intentional best practices across planning, tool selection, implementation, and reflection.	The lesson-plan builder and teacher tools embody the plan/select/implement/reflect cycle: strategy-tagged activities (plan/select), print-ZIP output into the teacher's own plan (implement), and mastery analytics (reflect). Teacher-facing guidance and usage guides ship with each deck. MEETS DOCTRINE 00_START_HERE/ PRODUCT_MODEL_DOCTRINE.md APP CODE app/teacher-tools/page.tsx LIVE ROUTE /teacher-tools
A4-MONITOR WCS Technology Use Guidance — Area 4 (proactive monitoring practices)	Stakeholders use proactive monitoring practices to keep student technology use safe, responsible, and instructionally focused.	The closed-loop environment is monitoring by design: no link-outs, no open-web surface, first-party self-hosted video, and teacher-visible progress/mastery so a teacher can see exactly what each student is doing. MEETS DOCTRINE CLAUDE.md APP CODE lib/compliance/sourcing.ts APP CODE lib/progress-store.ts

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
A4-DIGLIT WCS Technology Use Guidance — Area 4 (annual age-appropriate digital literacy incl. AI, state law); References: TDOE Computer Science standards, TDOE Teen social media & internet safety guidance	Age-appropriate digital literacy — including instruction on the use of AI — is taught annually to comply with state law.	The district's digital-literacy curriculum is the primary vehicle; History Hack supports it as a US-History course by modeling and disclosing responsible/AI use — a published AI-disclosure page and content-governance policy show students and families exactly how AI is and is not used (no AI grades student writing). MEETS CONTENT 08_DISTRICT_REFERENCE/District-AI-Disclosure-Correction-Notice.md APP CODE app/ai-disclosure/page.tsx APP CODE docs/compliance/content-governance-policy.md LAW/Framework TDOE Teen Social Media & Internet Safety Guidance (2025); TN Public Chapter 808 (2026)
A4-WEBSITE WCS Technology Use Guidance — Area 4 (district technology website maintained)	A maintained website shares guidance, resources, and safeguards that support healthy technology use.	The district owns its website; History Hack contributes maintained, public web pages — the approach/technology-use ledger, trust center, and changelog — that document our guidance and safeguards and are kept current by the quarterly Administrative Review. MEETS APP CODE app/approach/page.tsx APP CODE app/trust/page.tsx CONTENT 06_COMPLIANCE_INTERNAL/ADMINISTRATIVE_REVIEW.md
A4-FAMILY WCS Technology Use Guidance — Area 4 (families use district resources; partner for balanced use)	Families use district- provided resources to understand expectations and safeguards and partner with schools for balanced technology use.	Because the product is print-first, families can see and support the work on paper at home, and the public trust/approach pages let any family understand the safeguards without an account. MEETS DOCTRINE 00_START_HERE/PRODUCT_MODEL_DOCTRINE.md APP CODE app/trust/page.tsx
APPENDIX — EXCEPTIONS		

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
APX-EXCEPT WCS Technology Use Guidance — Appendix (uninterrupted access for health/IEP/504/ ILP/assistive tech)	Exceptions ensure uninterrupted technology access for students who require it for health, an IEP/504/ILP, or disability-related assistive technology.	Supports are provided where necessary or needed and never block access: IEP/504 support profiles, the accommodations crosswalk, and WCAG 2.2 AA / assistive-technology interoperability documented in the VPAT/ACR ensure a student who needs the technology keeps it. MEETS DOCTRINE 00_START_HERE/ FRAMEWORKS_CANON.md APP CODE lib/feature-flags/iep504-support-profiles.ts APP CODE lib/accommodations-crosswalk.ts APP CODE docs/compliance/VPAT-2.5-ACR.md

TN CLASSROOM LAWS

LAW-660 WCS Policy No. 660 — Syllabus & Religion; TN syllabus/religious-materials requirements	A per-course syllabus is provided; instruction about religion is objective and constitutionally sound.	A per-unit course Syllabus Creator generates a print-ready syllabus with course description, unit-by-unit outline, an 'accessing instructional materials' notice, and an objective religion note. Content follows Policy 2.600 accuracy. MEETS APP CODE app/teacher-tools/syllabus/page.tsx APP CODE lib/syllabus/course-outline.ts LIVE ROUTE /teacher-tools/syllabus
LAW-939 WCS Policy No. 939 — American Founding Documents	Founding documents (Declaration of Independence, U.S. Constitution, Bill of Rights) are taught.	The founding documents are core content, analyzed in depth — and elevated in the Celebrate Freedom Week program, which centers analysis of the Constitution and the Declaration and their lasting impact. MEETS CONTENT 03_TEXTBOOK_UNITS APP CODE app/celebrate-freedom-week/page.tsx LIVE ROUTE /celebrate-freedom-week
LAW-330 WCS Policy No. 330 — Civics Seal	Support the pathway to the Tennessee Civics Seal / civic-readiness recognition.	Full US.01-US.95 standards coverage and civic-content emphasis (founding documents, government, Celebrate Freedom Week) support a school's Civics Seal pathway; the syllabus surfaces the civics-test requirement to students and families. MEETS CONTENT 05_STANDARDS_ALIGNMENT APP CODE app/teacher-tools/syllabus/page.tsx

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
LAW-442 WCS Policy No. 442 — U.S. Civics Test requirement	Students take/prepare for the U.S. Civics Test as required.	The generated syllabus carries an explicit Civics-test note so the requirement is communicated, and the item bank + civics content prepare students for it. MEETS APP CODE <code>app/teacher-tools/syllabus/page.tsx</code> APP CODE <code>lib/syllabus/course-outline.ts</code>
LAW-279 WCS Policy No. 279 — Celebrate Freedom Week (TN law; observed Sept 14-18)	Celebrate Freedom Week is observed with instruction on the founding documents and their history.	A dedicated Celebrate Freedom Week program is built into the platform: a cross-curricular reenactment ('We the People: The Great Debate'), a week schedule, a step-by-step path, and academically-approved resources, aligned to the WCS Celebrating America arc. EXCEEDS APP CODE <code>app/celebrate-freedom-week/page.tsx</code> LIVE ROUTE <code>/celebrate-freedom-week</code>
LAW-VOTER TCA 2-2-111 — Student voter-registration opportunity	Eligible students are given the opportunity to register to vote.	The civics content and syllabus surface civic participation; the voter-registration opportunity is a school-administered event that the course's civics emphasis supports. (Vendor contribution — the school administers the drive.) MEETS CONTENT <code>03_TEXTBOOK_UNITS</code> LAW/FRAMEWORK <code>TCA 2-2-111</code>
LAW-493 WCS Policy No. 493 — Prohibited Concepts in instruction	Instruction does not include the statutorily prohibited concepts.	Content is fact-based and standards-aligned under Policy 2.600, reviewed by the historian fact-check and Schedule F adoption gates; the prohibited-concepts constraint is part of the content-governance and adoption review. MEETS DOCTRINE <code>00_START_HERE/ADOPTION_STANDARD.md</code> APP CODE <code>docs/compliance/content-governance-policy.md</code> LAW/FRAMEWORK <code>WCS Policy No. 493; TN prohibited-concepts statute</code>
WCS BOARD POLICIES & SOPS		
WCS-4406 WCS Board Policy No. 4.406 — Use of the Internet	Internet use is safe, filtered, and instructionally purposed.	The closed-loop, self-hosted, no-link-out design means History Hack presents no open-internet surface to students — the strongest posture against the risks Policy 4.406 governs. EXCEEDS DOCTRINE <code>CLAUDE.md</code> APP CODE <code>lib/compliance/sourcing.ts</code> APP CODE <code>app/trust/page.tsx</code>

WCS / LAW SOURCE	REQUIREMENT	HOW HISTORY HACK MEETS IT · EVIDENCE
WCS-4215 WCS Board Policy No. 4.215 — Use of Artificial Intelligence Programs	AI programs are used consistent with board policy and disclosed.	A published AI-disclosure page states exactly where AI is and is not used, and a product guarantee ensures no AI grades student writing. Content-governance policy documents the guardrails. MEETS APP CODE <code>app/ai-disclosure/page.tsx</code> APP CODE <code>docs/compliance/content-governance-policy.md</code> CONTENT <code>08_DISTRICT_REFERENCE/District-AI-Disclosure-Correction-Notice.md</code>
WCS-4201 WCS Standard Operating Procedure No. 4.201 — Use of Artificial Intelligence	AI operational use follows the district SOP.	The AI-disclosure and content-governance artifacts document operational AI use consistent with the SOP; the correction-notice record shows we actively keep AI disclosures accurate. MEETS APP CODE <code>app/ai-disclosure/page.tsx</code> CONTENT <code>08_DISTRICT_REFERENCE/District-AI-Disclosure-Correction-Notice.md</code>
WCS-4209 WCS Standard Operating Procedure No. 4.209 — Chromebook repair, distribution, and collection	Instructional materials work within the district's managed-device (Chromebook) program.	History Hack runs in the browser (Chromebook-first) and is print-first, so instruction continues on paper if a device is out for repair — no student is blocked by device logistics. MEETS DOCTRINE <code>00_START_HERE/PRODUCT_MODEL_DOCTRINE.md</code> LAW/FRAMEWORK <code>WCS SOP 4.209</code>
WCS-4401 WCS Board Policy No. 4.401 — Textbooks and Instructional Materials	Instructional materials meet the district's adoption and review standards.	History Hack is built to the TDOE Schedule F / adoption bar with a full compliance package (Schedule F self-score, standards alignment, administrative review). The 'accessing instructional materials' notice in the syllabus meets the transparency expectation. MEETS CONTENT <code>06_COMPLIANCE_INTERNAL/schedule-f-completed.html</code> CONTENT <code>06_COMPLIANCE_INTERNAL/compliance.html</code> APP CODE <code>app/teacher-tools/syllabus/page.tsx</code>
