UNIT SUMMARY

In this unit students investigate how Europe moved from the divine right of kings toward the idea that power belongs to the people. They trace absolutism (Louis XIV, Peter the Great), the documents that limited monarchs (Magna Carta, the English Bill of Rights), the Enlightenment thinkers (Hobbes, Locke, Montesquieu, Rousseau), the English Civil War, and the causes, events, and worldwide effects of the French Revolution and Napoleon. Students source primary documents, take guided Cornell notes, build vocabulary, and argue from evidence (CER).

★ TENNESSEE CONNECTION

The natural-rights ideas at the heart of this unit — that government rests on the consent of the governed — flowed directly into Tennessee's own founding. The **Tennessee Constitution of 1796** opens by declaring “**that all power is inherent in the people, and all free governments are founded on their authority**” — the same social-contract principle Locke and Rousseau argued in this unit. Tennessee is in the story of the Age of Revolution, not a footnote.

WHAT STUDENTS & FAMILIES CAN EXPECT

Over this unit your student will learn to explain how ideas about power and rights changed, analyze real primary sources (statutes, declarations, philosophers' writings), write evidence-based arguments, and set and track a SMART goal. Every activity has notebook-lined space to write, EN/ES vocabulary support, and clearly marked Entry / On-Level / Extension paths.

CORE PATH — READ ONE CHUNK AT A TIME

The Divine Right of Kings. The divine right of kings was the belief that a monarch received the authority to rule directly from God, making the king answerable to God alone rather than to his subjects. Writers such as Bishop Jacques-Bénigne Bossuet argued that royal power was sacred and that resisting the king was resisting God's will. This idea gave absolute monarchs a religious justification for ruling without a parliament or shared power. It became the intellectual foundation of European absolutism in the seventeenth and eighteenth centuries.

Louis XIV and Versailles. Louis XIV of France, called the Sun King, reigned from 1643 to 1715 and ruled as the model absolute monarch, centralizing power in his own hands. He transformed Versailles into his seat of government in 1682 and required leading nobles to live there, where elaborate court rituals kept them dependent on royal favor and unable to challenge him. He collected taxes and enforced his laws through royally appointed officials called intendants, and in 1685 he revoked the Edict of Nantes, ending toleration of French Protestants. His costly wars and lavish court projected French power but placed heavy strain on the kingdom's finances.

Peter the Great and Russian Absolutism. Peter the Great ruled Russia from 1682 to 1725 and used absolute power to modernize and expand his empire. Through a policy of westernization, he reorganized the army along European lines, built a navy, and brought the Russian Orthodox Church under state control. In 1703 he founded St. Petersburg as a new capital and 'window to the West,' and he expanded the government bureaucracy to strengthen his authority over the nobility. His reforms increased Russia's military might but were forced through with harsh taxation and forced labor.

Strengths and Weaknesses of Absolutism. Absolutism gave states strong central governments that could raise armies, collect taxes, and act quickly, bringing a measure of order and stability. However, its weaknesses were serious: enormous spending on wars and palaces drained treasuries, heavy taxes fell on ordinary people, and there were no legal checks on a ruler's mistakes. Decisions like Louis XIV's revocation of the Edict of Nantes drove skilled Protestants out of France and damaged the economy. Because power rested on one person, an unwise or overreaching monarch could weaken the entire state.

D. Frederick the Great
2. Why did Louis XIV require many leading French nobles to live at the Palace of Versailles?
A. To keep them under his watch and reduce their ability to challenge him
B. To train them as military officers for his foreign wars
C. To let them govern their own provinces with complete independence from the crown
D. To share royal power equally among the nobility
3. What was the main goal of Peter the Great's policy of westernization?
A. To reject foreign influence and preserve old Russian traditions
B. To give the boyars greater independent power
C. To return the Orthodox Church to full political control
D. To modernize Russia by adopting Western European technology
4. A historian argues that absolutism weakened France over the long run. Which piece of evidence best supports that claim?
A. Louis XIV expanded the royal palace at Versailles
B. Louis XIV centralized all tax collection through royally appointed intendants
C. Louis XIV's costly wars and religious persecution drained the economy
D. Louis XIV strengthened the monarchy's authority over the French nobility

Activity 4 · Close Read · key terms first, then evidence

CORE PATH — READ ONE CHUNK AT A TIME

Why Limit Royal Power?. As monarchs claimed greater and more absolute authority, some groups pushed back against arbitrary rule and demanded protections written into law. In England, first the nobility and later an elected Parliament sought guarantees that the king could not seize property, imprison people, or tax them at will. These struggles produced written documents that placed the ruler under the law rather than above it. Over time, these limits helped move England toward a constitutional monarchy.

The Magna Carta (1215). In 1215, rebellious barons forced King John of England to seal the Magna Carta at Runnymede. The charter established that the king was subject to the law, promising that no free man could be imprisoned or stripped of his rights except by lawful judgment and that certain taxes could not be levied without common counsel. Although it mainly protected the feudal rights of nobles, it planted the enduring principles of due process and the rule of law. Later generations reinterpreted it as a foundation for individual liberty and limited government.

The Glorious Revolution and English Bill of Rights (1689). In the Glorious Revolution of 1688, Parliament removed the Catholic King James II and offered the crown to William and Mary on new terms. Those terms were written into the English Bill of Rights in 1689, which declared that the monarch could not suspend laws, levy taxes, or keep a standing army in peacetime without Parliament's consent. It also protected free elections, free debate in Parliament, and the right to petition the king. The document made clear that the monarchy's power now depended on Parliament and the law.

Comparing the Two Documents. Both the Magna Carta and the English Bill of Rights limited the power of the crown and affirmed that the ruler must obey the law, but they differed in scope. The Magna Carta of 1215 mainly protected the feudal privileges of nobles, while the Bill of Rights of 1689 shifted real authority to an elected Parliament and protected broader political rights. Together they show a long development from feudal limits toward constitutional government. Both documents later influenced the framers of the U.S. Constitution and its Bill of Rights.

Reason and the Enlightenment. The Enlightenment was an intellectual movement of the seventeenth and eighteenth centuries that applied reason and observation to human society and government. Thinkers questioned the divine right of kings and asked instead where legitimate political authority should come from. They developed the idea of a social contract, an agreement that explains why people form governments and what those governments owe the people. Their writings would later inspire revolutions and constitutions in Europe and the Americas.

Hobbes and the Social Contract. In his 1651 book *Leviathan*, Thomas Hobbes argued that human life without government was a 'war of all against all' in which existence was 'solitary, poor, nasty, brutish, and short.' To escape this dangerous state of nature, he claimed people agree to surrender their rights to a powerful ruler who can keep order. For Hobbes, the social contract justified strong, even absolute, government as the price of security. His pessimistic view of human nature set the terms that later thinkers would debate.

Locke's Natural Rights. John Locke offered a more hopeful view in his *Two Treatises of Government*, published in 1689. He argued that all people are born with natural rights to life, liberty, and property, and that governments are created by the consent of the governed to protect those rights. If a government violates the people's rights, Locke said, the people have the right to change or overthrow it. His ideas deeply influenced later documents such as the American Declaration of Independence.

Montesquieu and Rousseau. In *The Spirit of the Laws* (1748), Baron de Montesquieu argued that political power should be divided among separate branches so that no single part of government becomes too powerful, an idea known as the separation of powers. Jean-Jacques Rousseau, in *The Social Contract* (1762), argued that legitimate government rests on the 'general will' of the people, an early expression of popular sovereignty. Both writers rejected absolute monarchy and located real authority in the people or in balanced institutions. Their ideas shaped modern democratic government and constitutional design.

- 1.** Which Enlightenment philosopher argued that people have natural rights to life, liberty, and property?
A. Thomas Hobbes
B. Jean-Jacques Rousseau
C. John Locke
D. Bishop Bossuet
- 2.** In Leviathan, Thomas Hobbes argued that people should give up their rights to a strong ruler mainly in order to do what?
A. Gain security and escape the violence of a lawless state of nature
B. Guarantee the people's right to overthrow an unjust government
C. Create a separation of powers among branches of government
D. Ensure that every law came directly from the general will of the people
- 3.** How did John Locke's view of the social contract differ from Thomas Hobbes's view?
A. Locke believed that people must surrender all of their natural rights to an all-powerful king
B. Locke rejected the idea of any government at all
C. Locke argued that the state of nature was a constant state of war
D. Locke argued that government exists to protect rights and may be overthrown if it fails
- 4.** What was the main purpose of Montesquieu's idea of the separation of powers?
A. To place all governing power into the hands of one monarch
B. To divide government into branches so no one part becomes too powerful
C. To eliminate the need for any written laws
D. To place religious leaders in complete and total charge of the government

SELF-CHECK KEY (COMMIT YOUR ANSWERS FIRST!)

- 1. C** — John Locke's Second Treatise identified life, liberty, and property as natural rights.
- 2. A** — Hobbes said people trade freedom for security to escape the 'war of all against all.'
- 3. D** — Locke held that government must protect natural rights and can be replaced if it does not, unlike Hobbes's absolute sovereign.
- 4. B** — Montesquieu proposed dividing power among branches to prevent tyranny.

CORE PATH — READ ONE CHUNK AT A TIME

A King and His Divine Right. When Charles I became king of England in 1625, he believed in the divine right of kings, the idea that his power came from God and that he answered to no one but God. This conviction put him at odds with Parliament, which held the power to approve new taxes. Charles resented having to bargain with lawmakers for money to run the government and fight his wars. The stage was set for a decades-long struggle over who truly ruled England.

Taxes, Parliament, and the Petition of Right. After Charles pressured subjects for forced loans, Parliament in 1628 made him accept the Petition of Right, which said the king could not tax or imprison people without its consent. Angered by these limits, Charles dissolved Parliament in 1629 and ruled alone for eleven years, a period called the Personal Rule. To raise money without Parliament, he revived old fees such as ship money, extending it to inland towns that had never paid it. These actions convinced many English people that the king was becoming a tyrant.

Religion, Rebellion, and War. Religious conflict deepened the crisis, as Puritans in Parliament opposed the High Church reforms of Charles and Archbishop William Laud, which they saw as too close to Catholicism. When Charles tried to force a new prayer book on Presbyterian Scotland, the Scots rebelled, and the king was forced to recall Parliament in 1640 to fund an army. Instead of granting money, the Long Parliament demanded reforms, and the standoff turned violent when Charles raised his royal standard at Nottingham in August 1642. The nation split into Royalists, who backed the king, and Parliamentarians, who fought to limit his power.

Regicide and Its Aftermath. Parliament's New Model Army, shaped by Oliver Cromwell, defeated the Royalists, and after a second war the army put the king on trial for treason. Charles I was executed on 30 January 1649, and England became a republic called the Commonwealth, later governed by Cromwell as Lord Protector. The monarchy returned under Charles II in 1660, but the memory of the war endured, and when Parliament forced out another king in the Glorious Revolution of 1688, it passed the English Bill of Rights in 1689. That settlement made England a constitutional monarchy, permanently limiting the crown's power.

CORE PATH — READ ONE CHUNK AT A TIME

An Old Order Under Strain. Before 1789 France lived under the Ancien Régime, an absolute monarchy ruled by King Louis XVI, in which society was divided into three legal estates. The First Estate was the clergy and the Second Estate was the nobility, and together they made up a tiny fraction of the population yet enjoyed special privileges and paid almost no taxes. The Third Estate, which included peasants, urban workers, and the growing bourgeoisie, made up about 97 percent of the people yet carried nearly the entire tax burden. This deep inequality bred resentment that would help ignite the revolution.

Debt, Bread, and a Broken Treasury. France's government was drowning in debt after decades of costly wars, including the expensive support it gave the American Revolution against Britain. Lavish spending at the palace of Versailles worsened the crisis, and finance ministers such as Jacques Necker and Charles de Calonne could not push reforms past the privileged estates. A terrible harvest in 1788 then sent bread prices soaring, and bread was the main food of ordinary people. With the treasury near bankruptcy and families going hungry, economic desperation pushed France toward the breaking point.

Ideas That Lit the Fuse. Enlightenment thinkers gave the French new ways to question their government, arguing that political power should rest on reason and natural rights rather than tradition. Montesquieu urged a separation of government powers, Rousseau argued that legitimate authority comes from the will of the people, and Voltaire attacked censorship and abuse. The American Revolution seemed to prove these ideas could work, showing that a people could throw off a king and build a government based on liberty. Educated members of the Third Estate began to imagine a very different France.

A King Too Weak to Reform. King Louis XVI was well-meaning but indecisive, and he struggled to control a court and nobility determined to protect their privileges. When he tried to tax the wealthy, the Assembly of Notables in 1787 and the noble-run law courts blocked his ministers' plans. Out of money and options, Louis was forced to summon the Estates-General in 1789, the first meeting of that body since 1614. There the Third Estate, denied a fair voice, demanded real political power, and the revolution began.

1789: The Revolution Begins. When the Estates-General met in May 1789, the Third Estate broke away and declared itself the National Assembly, claiming to speak for the nation. Locked out of their hall, its members swore the Tennis Court Oath on June 20, vowing not to disband until France had a constitution. Fearing the king would crush them, a Paris crowd stormed the Bastille fortress on July 14, 1789, an event that became the revolution's great symbol. That August the Assembly issued the Declaration of the Rights of Man and of the Citizen, proclaiming liberty and equality.

A Constitutional Monarchy. The revolution's first government kept the king but limited his power, and the Constitution of 1791 made France a constitutional monarchy with Louis XVI as a limited ruler. Trust in the king collapsed after his family tried to flee the country in the Flight to Varennes in 1791 and was caught. War with Austria and Prussia in 1792 raised fears that the king was secretly aiding France's enemies. In August 1792 a Paris uprising overthrew the monarchy, ending the experiment with a constitutional king.

Republic, Regicide, and Terror. A new assembly called the National Convention proclaimed France a republic in September 1792 and put the former king on trial. Louis XVI was convicted of treason and executed by guillotine on January 21, 1793. As foreign armies and internal revolts threatened the republic, the Committee of Public Safety under Maximilien Robespierre launched the Reign of Terror from 1793 to 1794, executing thousands of suspected enemies in the name of the people. This democratic despotism ruled through fear, until the Convention turned on Robespierre and sent him to the guillotine in July 1794.

From Directory to Empire. After the Terror, a five-man government called the Directory ruled from 1795 to 1799 but was widely seen as weak and corrupt. Amid the instability, the popular general Napoleon Bonaparte seized power in a coup d'état in November 1799, making himself First Consul of France. He restored order and pushed through reforms, steadily gathering power into his own hands. In 1804 Napoleon crowned himself Emperor, replacing the republic with the Napoleonic Empire and completing the revolution's journey from constitutional monarchy to one-man rule.

From Revolution to Power. Born in Corsica in 1769, Napoleon Bonaparte rose through the French army during the chaos of the French Revolution. In the coup d'état of 18 Brumaire (November 1799) he overthrew the Directory and made himself First Consul. His talent for battle, propaganda, and administration let him crown himself Emperor of the French in December 1804. Political instability at home created the opening that his ambition and military skill filled.

Building a European Empire. Between 1805 and 1807 Napoleon defeated Austria, Prussia, and Russia in a string of victories such as Austerlitz. He reorganized conquered lands, spread reforms like the Napoleonic Code, and placed relatives on European thrones. To ruin Britain without a navy strong enough to invade it, he launched the Continental System in 1806 to cut off British trade. At its height his empire and allied states stretched across most of continental Europe.

Geographic Overreach. The empire's geography became its weakness. The Peninsular War in Spain (1808-1814) drained French troops in a grinding guerrilla conflict that Napoleon called his 'Spanish ulcer.' In 1812 he invaded Russia with a Grande Armée of roughly 600,000 men, but vast distances, Russian scorched-earth tactics, and a brutal early winter destroyed it during the retreat. Fighting on two distant fronts at once stretched his forces past their limit.

Defeat and Exile. Weakened by the Russian disaster, Napoleon was defeated by a coalition and forced to abdicate in April 1814, then exiled to Elba. He returned for the Hundred Days in 1815 but was crushed at Waterloo on June 18, 1815. He was exiled again, this time to the remote South Atlantic island of Saint Helena, where he died in 1821. Political overreach and hostile geography together brought down the empire military genius had built.

CHOOSE THE BEST ANSWER (CIRCLE A LETTER)

- What was the main goal of Napoleon's Continental System, established by the Berlin Decree of 1806?
 - To block British trade with the European continent
 - To recruit soldiers for the invasion of Russia
 - To unify the German states into one kingdom
 - To replace the Napoleonic Code with older feudal law
- Which combination of geographic factors most directly turned the 1812 invasion of Russia into a catastrophe for the Grande Armée?
 - Short supply lines and an unusually mild winter
 - Vast distances, scorched-earth destruction of supplies, and a brutal early winter
 - Blocked Alpine passes and a Spanish naval blockade
 - Dense tropical forests that slowed the cavalry advance
- At which 1815 battle did Napoleon suffer his final defeat?
 - Leipzig
 - Austerlitz
 - Waterloo
 - Borodino
- A student argues that Napoleon's empire fell mainly because he overextended it geographically. Which evidence best supports that claim?
 - His 1804 coronation as emperor
 - The civil-law reforms of the Napoleonic Code
 - His family origins on the island of Corsica
 - Fighting costly wars in Spain and Russia at the same time

Enlightenment Ideas. During the 1700s Enlightenment thinkers argued that human reason, not tradition or kings, should shape government. The English philosopher John Locke wrote in his *Second Treatise of Government* (1689) that people are born with natural rights to life, liberty, and property. Locke also argued that governments exist through a social contract and rule only by the consent of the governed. These ideas gave revolutionaries a language for challenging absolute monarchy.

Jefferson and the Declaration. In 1776 the Continental Congress chose Thomas Jefferson as the principal author of the Declaration of Independence. Jefferson borrowed directly from Locke, writing that all men are 'created equal' with 'unalienable Rights' to 'Life, Liberty and the pursuit of Happiness.' He argued that government derives its 'just powers from the consent of the governed' and may be altered when it violates those rights. The document turned Enlightenment theory into a public justification for independence.

The American Revolution. The American Revolution (1775–1783) was a war of independence in which thirteen colonies broke away from a distant British ruler and king. The colonists largely kept their existing local governments and social structures while rejecting outside control. The conflict ended with the recognition of the United States and the later framing of a written constitution. Its aim was self-government rather than the overthrow of an entire social order.

The French Revolution Compared. The French Revolution began in 1789 when the people rose against their own monarchy and the privileges of nobility and clergy. Inspired by similar Enlightenment ideas, the National Assembly issued the Declaration of the Rights of Man and of the Citizen, echoing that men are 'born and remain free and equal in rights.' Unlike the American Revolution, it overturned France's internal social and political order and grew far more violent, passing through the Reign of Terror. Both revolutions shared Enlightenment ideals, but they targeted very different kinds of authority.

Exporting Revolutionary Law. The French Revolution's ideals did not stay inside France. In 1804 Napoleon promulgated the Napoleonic Code, a unified civil law that swept away feudal privileges and guaranteed legal equality among men and the protection of property. As French armies advanced, they carried the Code across Europe, where it reshaped legal systems in the German states, Italy, and beyond. Even after Napoleon fell, many of these legal reforms endured, spreading Enlightenment principles far from Paris.

The Conservative Reaction. The upheaval also frightened Europe's monarchs, who wanted to prevent future revolutions. At the Congress of Vienna (1814–1815), led by Austria's Prince Metternich, the great powers redrew borders and restored many old ruling families. They created the Concert of Europe, a system in which the major states cooperated to maintain a balance of power and suppress revolutionary movements. For decades this arrangement helped Europe avoid another continent-wide war.

Revolution Crosses the Atlantic. The revolution's promise of liberty and equality inspired the enslaved population of France's richest colony, Saint-Domingue. Beginning in 1791, a massive uprising led by figures such as Toussaint Louverture challenged both slavery and colonial rule. The revolutionaries defeated French, Spanish, and British forces in a brutal and costly struggle. Their success showed that revolutionary ideals could be turned against the very empires that proclaimed them.

The Birth of Haiti. On January 1, 1804, Jean-Jacques Dessalines declared independence, creating Haiti — the first nation founded by formerly enslaved people and the second independent country in the Americas. The revolution permanently abolished slavery in the colony and alarmed slaveholding societies across the Atlantic world. Its example encouraged abolitionists while frightening governments that depended on slavery. Together, the Napoleonic Code, the Concert of Europe, and the Haitian Revolution show how the French Revolution changed Europe and the wider world.

THESIS MINI-LESSON — HOW TO WRITE A THESIS

A thesis takes a position and previews your reasons: “Although ___, the bigger effect was ___ because ___.” You’ll carry this thesis into Activity 7 (CER).

Text-dependent question	Evidence from the passage	What it shows
Main idea of “Exporting Revolutionary Law” + the evidence that supports it		

Text-dependent question	Evidence from the passage	What it shows
Main idea of “The Conservative Reaction” + the evidence that supports it		
Main idea of “Revolution Crosses the Atlantic” + the evidence that supports it		
Main idea of “The Birth of Haiti” + the evidence that supports it		

ACT Connection · Reading — main idea + evidence is exactly the ACT Reading skill.

Activity 5 · Primary Source / HIPPO · source it first

THE DOCUMENT — JEAN-JACQUES DESSALINES AND LOUIS BOISROND-TONNERRE, HAITIAN DECLARATION OF INDEPENDENCE (1804)

“We have dared to be free; let us dare to be so by ourselves and for ourselves.”

Jean-Jacques Dessalines and Louis Boisrond-Tonnerre, Haitian Declaration of Independence, 1 January 1804 (English translation), Duke University Libraries, Haiti Collection.

SOURCE IT FIRST

Before analyzing, source the document: who made it, when, and why. Then work the HIPPO frame and answer in a complete CER.

HIPPO move	What I notice
Historical context — what was happening when this was made?	
Intended audience — who was meant to see it?	
Point of view — whose perspective, and what is left out?	

HIPPO move	What I notice
Purpose — why was it created?	
Outside evidence — what do I already know that connects?	

CONFIDENCE CHECK-IN

Rate your sourcing 1–4. What would move you up one level?

Future Ready · Civic responsibility — weighing evidence fairly is a citizen's skill.

CHOOSE THE BEST ANSWER (CIRCLE A LETTER)

- What was the Napoleonic Code of 1804?
 - A unified civil-law code guaranteeing legal equality and property rights
 - A treaty that redrew the borders of Poland
 - A plan to industrialize French factories
 - A royal decree restoring feudal privileges
- What was the main goal of the Concert of Europe formed after 1815?
 - To spread revolution to every European capital
 - To maintain a balance of power and suppress future revolutions
 - To grant immediate independence to all colonies
 - To finance Napoleon's return from exile
- Why is the Haitian Revolution historically significant?
 - It restored French colonial rule across the Caribbean
 - It launched the Congress of Vienna
 - It created the first nation founded by formerly enslaved people
 - It permanently ended all Atlantic trade
- A historian claims the French Revolution's ideals spread far beyond France. Which pairing best supports that claim?
 - The Napoleonic Code applying only within the Paris city limits
 - The Congress of Vienna abolishing every European monarchy
 - Enslaved Haitians rejecting the ideals of liberty and equality
 - The Napoleonic Code reshaping European law while Haiti won emancipation and independence

SELF-CHECK KEY (COMMIT YOUR ANSWERS FIRST!)

1. **A** — Recalls the purpose of the Napoleonic Code.
2. **B** — Requires identifying the stabilizing aim of the Concert of Europe.
3. **C** — Requires recognizing Haiti's significance as a free state.
4. **D** — Asks students to select paired evidence showing the revolution's global reach.

ACT Connection · Test format — timed multiple-choice with tempting distractors mirrors the ACT.

Activity 7 · Constructed Response (CER) · **claim · evidence · reasoning**

BIG QUESTION

Did the French Revolution spread liberty and equality, or did it mainly provoke reaction and control? Use evidence from the reading (Act 4) and the source (Act 5).

★ Entry (more support)	● On-Level (core)	▲ Extension (challenge)
Using a cause-and-effect organizer with a word bank, students write a short CER naming one way the French Revolution changed a place outside France, citing the source	Write the full CER (claim + 2 evidence + reasoning) using the organizer below.	Students write a full CER arguing whether the French Revolution mainly spread liberty or mainly provoked reaction, using evidence from all three effects (Napoleonic Code, Concert of Europe, Haitian Revolution)

Claim	Evidence	Reasoning

SELF-GRADE RUBRIC (/12) — SCORE YOURSELF, THEN A PEER

Claim answers the question (0–4) · Evidence is accurate + specific (0–4) · Reasoning links evidence to claim (0–4). Peer review: one glow, one grow, one revision.

SPEAK IT · 60-SECOND MISSION BRIEF — STAND UP AND SAY IT

Present your CER out loud: state your **claim**, give **one** piece of evidence, and say **why it matters** — 60 seconds. Score the delivery 1–4 (clear voice · eye contact · evidence). Speaking your argument is a Ready-Graduate + interview skill.

Future Ready · Communication (spoken) — the Mission Brief builds interview-ready voice.

ACT Connection · English / Writing — building a claim with evidence is the ACT Writing task.
