How to Use This Workbook

Each standard (US.45–US.58) runs the same seven-activity cycle so students always know what comes next. The workbook is one common book designed for learner variability: every student follows the CORE PATH, and the optional supports flex access without lowering the goal.

The seven-activity cycle

- 1. Vocabulary (reference / word bank)
- 2. Vocabulary Studio (Frayer-inspired)
- 3. Direct-Teaching Cornell Notes
- 4. Close Read
- 5. Primary Source / Data Analysis (HIPPO)
- 6. Core Application: Practice Quiz
- 7. Constructed Response (CER)

Each standard also opens with a warm-up (Set Your Goal, Hook, Activate, Preview & Predict) and closes with an Exit Ticket.

Pacing — three schedule variants

Each activity carries a time chip. Choose the activities that fit your block; the rest become warm-ups, stations, or homework. Protect the Exit Ticket in every variant — it is your daily check for understanding.

46-minute regular day. Full cycle across the standard; run one to two activities per day plus the Exit Ticket.

43-minute activities schedule. Trim one optional support or move the Vocabulary Studio to homework; keep Close Read, Quiz/CER, and the Exit Ticket.

41-minute late-start. Prioritize CORE PATH: Cornell Notes or Close Read, one application (Quiz or CER), and the Exit Ticket.

Front / back printing (your choice)

Each activity is built as a front (clean, independent CORE PATH) with UDL/MTSS supports on the back page (Vocabulary Supports, HIPPO Supports, Writing Supports). Print front-only, back-only, or both — the goal on the front never changes.

UDL · MTSS Implementation

Supports are available by design and work alongside — never in place of — the accommodations and modifications in a student’s IEP or 504 plan.

CORE PATH

The essential instruction every student receives. Same rigor for everyone.

Vocabulary Supports (back of Activity 1)

Word-attack strategy, Spanish cognates, and quick practice. Assign for students who need a vocabulary on-ramp.

HIPPO Supports (back of Activity 5)

Guiding questions, a sentence frame, a worked model analysis, and a sourcing warm-up. Assign before the front-page source analysis for scaffolded access.

Writing Supports (back of Activity 7)

Sentence stems, a worked CER model, the CER rubric in student language, and an argument word bank. Assign for students building argument writing.

Response Choice

Students may show learning by writing, saying/recording, or diagramming — the standard is the thinking, not the format.

Constructed Response (CER) — Scoring Rubric

Score each trait 1–4 for a total of /16. Students self-grade against the same criteria on the front of Activity 7.

Trait	What a strong (3-4) response shows	Score
Claim	Answers the question in one clear, defensible sentence.	___ / 4
Evidence	Uses two specific, accurate facts drawn from the sources / standard.	___ / 4
Reasoning	Explains HOW the evidence proves the claim (not just restating it).	___ / 4
Conventions	Complete, readable sentences a reader can follow.	___ / 4

Scoring bands: 14–16 secure · 11–13 developing · 8–10 approaching · below 8 reteach.

Per-Standard Answer Keys & Reteach

Keep this section separate from students. Each standard lists the Practice Quiz key (with rationale), the Exit Ticket key, and a targeted reteach move. Worked CER and HIPPO models appear on the support (back) pages of the student workbook.
